4. Dairy plants include plants that manufacture one or more dairy products.

Sources: NASS Dairy Product and Milk Production Reports; U.S. Census Bureau/Annual Population Estimates/July 1, 2009

- Even though the West Region accounts for only 23 percent of the U.S. population, the region produces the largest percent share of U.S. nonfat dry milk (75 percent), butter (49 percent), and is even with the Central Region in milk production (41 percent).
- The Central Region produces half of the total U.S. Ice cream and yogurt production (51 percent and 50 percent, respectively).
- Almost half of the dairy plants were located In the Central Region.
- The Atlantic and Central Regions each represent nearly the same percent shares of the U.S. population (37 percent and 39 percent respectively), however the Atlantic region's geographic area is much smaller in size and accounts for only 18 percent of the milk produced in the U.S.

The California Dairy Information Bulletin (ISSN-0892-4406) is published monthly as a cooperative effort of the California Department of Food and Agriculture Dairy Marketing and Milk Pooling Branches, and the USDA/NASS California Agricultural Statistics Service. In accordance with the California Government Code and ADA requirements, this publication can be made available in an alternative format by contacting Karen Dapper at (916) 341-5988, by email at dairy@cdfa.ca.gov, or contacting TDD 1-800-735-0193.

The Dairy Statistics Unit appreciates the cooperation of all dairy processors by filing monthly statistical reports with our office. These reports are carefully reviewed in an attempt to identify and correct any errors in reporting. All data is received directly from either California dairy processors or federal Milk Market Administrator offices in regions neighboring California. While data is submitted from reliable sources, no representation is made as to the complete accuracy of the data reported. Data is published subject to errors, revisions, or withdrawals without notice.
