AGREEMENT TO PARTICIPATE IN

METHANE MANURE MANAGEMENT RESEARCH

FAAST PIN:

CDFA has partnered with the dairy organization Dairy Cares to fund a two-year research project titled - *Benchmarking of Pre-Alternative Manure Management Program Dairy Emissions* led by Dr. Frank Mitloehner of the Department of Animal Sciences at the University of California, Davis. The goal of the research project is to further understand methane and other emissions on dairies. The objectives of the project are to: 1) assess the utility and accuracy of existing air emission models for California dairies and 2) conduct baseline emissions measurements for selected dairies prior to the installation of an AMMP-funded practice on four to six of the CDFA AMMP-funded dairies. Agreeing to participate in the study does not mean that the dairy will be selected for the research. This will be determined by the project leader at a later date. Once selected, all sampling and monitoring costs will be covered by the research grant. Additional information on the study is available at: https://www.cdfa.ca.gov/dairy/AMMP_RFP.html .

( ) I AGREE TO PARTICPATE in a CDFA-funded study on dairy baseline emissions.

( ) I DO NOT WISH TO PARTICIPATE in this research.
