Fruit and Nut Crops

California accounts for 46 percent of the U.S. fruit and nut production and 61 percent of the national value of fruit and nut crops. In 2008, the state produced 14.9 million tons of fruit and nuts, 7 percent more than 2007. Grape production totaled 6.55 million tons for 2008, which was 5 percent larger than the 2007 grape crop. The state's total production value of all fruits and nuts in 2008 was \$11.2 billion, up slightly from 2007.

Grapes continue to be the top-valued fruit and nut crop at \$2.94 billion, decreasing 4 percent from the previous year. Crops with record production in 2008 were almonds, tangerines, walnuts, sweet cherries, and strawberries. California accounted for nearly all the national production of almonds, dates, figs, kiwifruit, olives, Clingstone peaches, pistachios, dried plums, raisins, and walnuts.

Notable Increases in California Production:

Tangerines	91%
Plums, dried	
Oranges, Valencia	48%
Oranges, Navel	30%
Avocados	

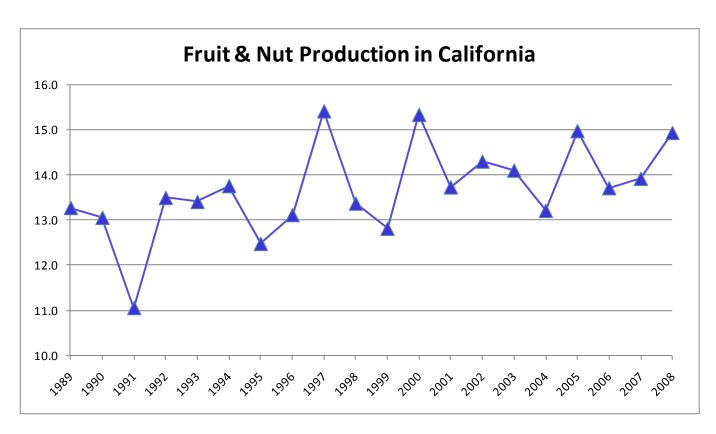

Notable Decreases in California Production:

Boysenberries	55%
Olives.	
Raspberries	31%
Lemons	

According to the USDA's Economic Research Service, the typical American consumes around 280 pounds of fruit and tree nuts (fresh and processed) each year. Per capita consumption of fruits and tree nuts is the third largest among the major food groups, after dairy products and vegetables. Production is harvested from less than 2 percent of the total harvested cropland in the U.S., but generates on average over \$15 billion in U.S. farm cash receipts annually. Small, family, or individually run farm operations continue to dominate U.S. fruit and tree nut production. Most of the production and revenue, however, come from the largest farms.

The nation's largest fruit producing states are California, Florida and Washington. California accounts for about half of the harvested fruit acreage, Florida almost one-fourth, and Washington around one-tenth. California's production accounts for more than half of the value of all fresh fruits. Oranges, grapes, apples, bananas and grapefruit were the top five fruits consumed in the U.S. during the 2000s.

U.S. tree nut production since the mid-2000s generated, on average, nearly \$4 billion in annual farm cash receipts, with almonds, walnuts, pistachios and pecans accounting for most of the sales. California is the nation's number one producer of tree nuts. Almost 90 percent of the U.S. tree nut production is harvested from Golden State orchards annually. The top three nuts consumed in the U.S. are almonds, walnuts and pecans.

^{1/} Non-bearing shown only in year when acreage surveys were conducted.

^{2/} Return at processing plant door or packinghouse door.

^{3/} Acres of raisin type grapes enrolled in the California Raisin Industry Diversion (RID) program were; 1998-2000 – zero; 2001 – 41,000; 2002 – 27,000; 2003-2007 – zero. These acres were deducted from bearing acres before calculating yield.

^{4/} Production is the fresh equivalent of dried and not dried.

^{5/} Acreage by county, variety and year of planting for 2007 are available upon request.

^{6/} These crops are apricot-plum crosses (aprium, plumcot, pluots), black walnuts, chayotes, cherimoyas, chestnuts, feijoas, guavas, jojobas, jujubes, kumquats, limes, loquats, Macadamia nuts, persimmons, pomegranates, prickly pears, quince, citrus by-products, and orchard biomass.
