

Protecting Equine Health

The CDFA Animal Health Branch is a national leader in addressing situations which threaten the health of the equine industry. It is the Branch's responsibility to react promptly to threatening situations and address equine diseases of concern. Two (2) equine specific advisory committees, namely the Equine Advisory Committee and the Equine Medication Monitoring Program Advisory Committee, assist the State Veterinarian and the Secretary of Agriculture in making informed decisions related to equine health. The committees are comprised of some of the nation's most respected practicing veterinarians, researchers, scientist and industry leaders.

\$13.3 billion
Economic Impact of California Equine Industry

540,000
Horses in California

115,500
