Ms. Hughes stated that Standardization Contracts were first introduced in 2004 after use of the Memorandum of Understanding (MOU), was no longer allowed. In 2011, Cooperative Agreements replaced the County Contracts and additional Counties were granted agreements at that time as well.

When entering into a Cooperative Agreement, the Program requires each county to submit an application that includes: a work plan proposal, and fiscal display.

Ms. Hughes went on to mention that some of the 2017/18 FY Cooperative Agreement funds were reallocated. Monterey County and Riverside County funding amounts were reduced while Los Angeles County and San Diego County received some additional funding. Overall, the proposed funding reflects a reduction of 5% for the 2017/18 FY.

County representatives in attendance reported on current enforcement activities and their proposed 2017/18 FY cooperative agreement work plans. The total proposed for the 2017/18 FY County Cooperative Agreements is $971,980.

There was a discussion regarding the Product Traceability Initiative (PTI) stickers. Mr. Rob Milner from Monterey County, explained that the lettuce industry wants to have all of the required information included in the PTI sticker, instead of on the container. Currently, the PTI sticker is too small to allow all of the required information. To resolve the size issue, the lettuce industry would like to remove the total pounds requirement for the PTI sticker. At this year’s National Institute of Standards and Technology’s Western Conference, representatives from Monterey County presented possible changes to the quantity statement regulations. ITEM 7: PROGRAM UPDATES

Ms. Hughes mentioned that the changes to the avocado regulations were adopted December, 2016. These regulatory changes repealed standard container requirements, container weight requirements, and amended labeling requirements.

Ms. Hughes also mentioned that the Department received a petition from the California Fresh Fruit Association. The petition asked for a regulatory change that would repeal the varietal marking requirement when packing apricots. In 2006 the tree fruit industry repealed their varietal marking requirement section in the regulations. When the regulations were written, apricots were omitted from the changes. The newly proposed regulatory change will align the marking and labeling requirements for apricots with the rest of the tree fruit industry.

Mr. Steve Patton gave an update on the Food Safety Modernization Act (FSMA). On October 31, 2015, the FSMA rules were released. The rules establish standards for growing, harvesting, packing, and holding produce on domestic and foreign farms. CDFA received $11 million in grant money, to be spread over five years. This grant money will allow the Department to create the Environmental Audit Unit (EAU). The EAU will help educate and enforce the FSMA produce safety rules. One of the projects the EAU will be working on is creating a master list of all farms in California, and assessing the food safety risks for each farm.
