

Field Crops

The total value of California field crop production decreased to \$5.43 billion, down 7.95 percent from 2011. Alfalfa, Cotton and Rice had a large impact on California's field crop totals in 2012. In what otherwise would have been a static year for total field crop value, the large decrease in these values led to the decrease in total field crop value.

Cotton acreage and value decreased for 2012. The price of Upland cotton was \$0.91 per pound, down 12 percent from 2011. The total value of Upland cotton decreased from \$278 million in 2011 to \$213 million in 2012, a decrease of 23 percent. California growers planted 225 thousand acres of American Pima cotton, down 49.0 thousand from 2011. The American Pima cotton price decreased from \$1.45 to \$1.24 per pound in 2012. This resulted in the value of American Pima cotton decreasing from \$546 million in 2011 to \$437 million in 2012.

In 2012, California produced approximately 6.56 million tons of alfalfa hay, valued at \$1.38 billion. Production of hay other than alfalfa increased 13 percent, while its total value increased 20 percent. Total hay production increased 9 percent from 2011. The increased acreage and production for all hay offset the lower hay prices, resulting in hay's value remaining virtually unchanged.

Rice plantings decreased by 4 percent, with 561 thousand acres planted in 2012. Medium grain rice contributed to 89 percent of the total rice acreage and 91 percent of the total production. Acres planted and harvested decreased, as well as production and price. The total value of rice production was \$771 million, a decline of 14 percent from the previous year.

California corn for grain production was valued at \$235 million for 2012, a 32 percent increase from 2011. Harvested acreage and price increased from the previous year and yield remained unchanged. Harvested acreage increased 20 percent to 180 thousand acres while price increased by 10 percent. Harvested acres of corn silage decreased by 11 percent to 425 thousand acres. Production of corn silage decreased to 11.3 million tons, down 9 percent from 2011.

Fifty-nine percent of the California wheat crop was harvested for grain in 2012. Wheat was planted on 750 thousand acres and 445 thousand were harvested for grain. Overall, production decreased 16 percent and value decreased 6 percent. The production of winter wheat decreased 26 percent from 2011, while Durum wheat production increased 13 percent from 2011. The value of all wheat production decreased 6 percent to \$337 million.

Notable Increases in Value:

Sunflower, Oil	56%
Oats	52%
Sunflower, All	46%
Corn, Grain	32%
Potatoes, Sweet	32%

Notable Decreases in Value:

Corn, Silage.....	-30%
Sunflower, Non-Oil.....	-25%
Cotton, Upland.....	-23%
Potatoes, Fall.....	-22%

- ¹ Area planted includes preceding fall.
- ² Production is on a clean basis.
- ³ Missing data has not been published due to the estimate being discontinued, not estimated, or not available.
- ⁴ Includes varieties not listed separately. Excludes beans grown for garden seed.
- ⁵ Planted acreage is for all purposes.
- ⁶ Production ginned. Cotton bales are 480 lbs. net-weight.
- ⁷ Estimates began in 2005.
- ⁸ All alfalfa forage production is the sum of alfalfa harvested as dry hay; and alfalfa haylage and greenchop production after converting it to a dry equivalent basis.
- ⁹ All forage production is the sum of the following dry equivalents: alfalfa hay and all other hay harvested as dry hay, alfalfa haylage and greenchop, all other hay haylage and greenchop; after converting alfalfa and all other haylage and greenchop to a dry equivalent basis
- ¹⁰ Estimated marketings of alfalfa and other hay used as weights to calculate all hay prices.
- ¹¹ Includes only alfalfa and alfalfa mixtures that were harvested as haylage or greenchop (green weight). Alfalfa harvested as dry hay is not included.
- ¹² Includes all types of forage harvested as haylage or greenchop (green weight). Forage harvested as dry hay and corn and sorghum silage/greenchop are not included.
- ¹³ Sweet rice acreage has been included since the 2003 crop year, but not previous years.
- ¹⁴ Excludes wild rice.
- ¹⁵ Estimates began in 2000.
- ¹⁶ Relates to year of intended harvest for fall planted beets in central California and to year of planting for overwintered beets in central and southern California.
- ¹⁷ Preliminary Marketing Year Average Price.
- ¹⁸ Value derived from Minor Commodities Cash Receipts and updated with previous County Agricultural Commissioner data.
- ¹⁹ Beginning in 2010, winter and summer estimates included in spring total.
