

Fruit and Nut Crops

California accounts for 63 percent of the U.S. non-citrus fruit and nut production and 67 percent of the national value. Of the citrus crops, California accounts for 32 percent of the U.S. citrus production and 45 percent of the national value. In total, the state produced 16.2 million tons of fruit and nuts, 52 percent of the national total, up 7 percent from 2009. The state's total production value of all fruits and nuts in 2010 was \$13.3 billion, up 12 percent from 2009.

Grapes continue to be the top-valued fruit crop at \$3.2 billion, down 2 percent from the previous year. The California grape crop accounted for more than 90 percent of the 2010 United States' utilized grape production. Crops with record production in 2010 were almonds, blueberries, olives, pecans, pistachios, strawberries, sweet cherries, table grapes, tangerines and walnuts. California accounted for nearly all the national production of almonds, Clingstone peaches, dates, dried plums, figs, kiwifruit, olives, pistachios, raisins and walnuts.

U.S. tree nut production since the mid-2000s has generated, on average, nearly \$4 billion in annual farm cash receipts, with almonds, walnuts, pistachios and pecans accounting for most of the sales. California is the nation's No. 1 producer of tree nuts. Nearly 92 percent of the U.S. tree nut production was harvested from Golden State orchards in 2010.

According to the USDA's Economic Research Service, in 2010 California was the No. 1 exporter of agricultural commodities in the United States. Tree nuts were the No. 1 agricultural export for California, followed by fruits and vegetables.

The United States is among the top producers and consumers of fruit and tree nuts in the world. Each year, fruit and tree nut production generates about 13 percent of the U.S. farm cash receipts for all agricultural crops. More than 20 percent of U.S. fruit and tree nut production is destined for the export market, while imports make up over one-third of domestic fruit and tree nut consumption.

The typical American consumes around 270 pounds of fruit and tree nuts (fresh and processed products) each year. Apples, bananas, grapes and oranges are the most popular fruit while almonds, pecans and walnuts are the most preferred tree nuts.

The nation's largest fruit-producing states are California, Florida and Washington. California accounts for more than half of the harvested fruit acreage, Florida more than 10 percent, and Washington around 8 percent.

Notable Increases in Production:

Olives	321%
Avocados	212%
Pistachios	47%
Pecans	45%
Tangerines	40%
Kiwifruit.....	28%
Plums.....	26%

Notable Decreases in Production:

Plums, Dried	23%
Bartlett Pears	15%
Other Pears.....	9%
Figs.....	8%
Clingstone Peaches	8%

¹ Non-bearing shown only in year when acreage surveys were conducted.

² Return at processing plant door or packinghouse door.

³ Acres of raisin-type grapes enrolled in the California Raisin Industry Diversion (RID) program: 1998-2000 — zero; 2001 — 41,000; 2002 — 27,000; 2003-2010 — zero. These acres were deducted from bearing acres before calculating yield.

⁴ Production is the fresh equivalent of dried and not dried.

⁵ Acreage by county, variety and year of planting for 2007 are available upon request.

⁶ These crops are apricot-plum crosses (aprium, plumcot, pluots), black walnuts, chayotes, cherimoyas, chestnuts, feijoas, guavas, jojobas, jujubes, kumquats, limes, loquats, Macadamia nuts, persimmons, pomegranates, prickly pears, quince, citrus by-products, and orchard biomass.

¹ Missing data not published to avoid possible disclosure of individual operations.

² Total processed includes canned, frozen, juice and brined.

³ Small quantities processed included in fresh to avoid possible disclosure.

⁴ Includes substandard raisins diverted to other uses.

⁵ Processed and fresh fruit price not published to avoid possible disclosure, but included in total utilized.

⁶ Quantity and value include dried, but price excludes dried.

⁷ Processed mostly canned, but includes small quantities dried and other uses not published separately to avoid possible disclosure. Data for 2006 and 2007 not published to avoid possible disclosure.

⁸ Processed mostly juice, but includes small quantities canned and other uses not published separately to avoid possible disclosure.

¹ Non-bearing shown only in year when acreage survey conducted.

² Values are based on the edible portion of the crop only. Included in production are inedible quantities of no value:

2000 — 15.9 million pounds; 2001 — 16.8 million pounds; 2002 — 8.30 million pounds; 2003 — 20.8 million pounds; 2004 — 14.5 million pounds; 2005 — 16.1 million pounds; 2006 — 23.5 million pounds; 2007 — 17.5 million pounds; 2008 — 14.0 million pounds; 2009 — 20.0 million pounds.

³ Data for 2008 acreage by county, variety and year of planting available upon request.
