

December 6, 2022: HPAI Wild Bird Detections in Sutter and Yuba Counties

This is to notify you that the Eurasian strain H5N1 Highly Pathogenic Avian Influenza (HPAI) has been detected in wild bird species in Sutter County and Yuba County, California.

As of today, HPAI has previously been detected in domestic flocks in the following 11 California Counties: Butte, Calaveras, Contra Costa, Del Norte, El Dorado, Fresno, Monterey, Sacramento, San Diego, Stanislaus, and Tuolumne. With these new detections, HPAI has been detected in wild birds in 39 counties: Alameda, Butte, Colusa, Contra Costa, El Dorado, Fresno, Glenn, Humboldt, Kern, Lassen, Los Angeles, Marin, Mendocino, Merced, Monterey, Napa, Orange, Placer, Plumas, Riverside, Sacramento, San Benito, San Bernardino, San Diego, San Francisco, San Luis Obispo, San Mateo, Santa Clara, Santa Cruz, Shasta, Siskiyou, Solano, Sonoma, Stanislaus, Sutter, Trinity, Ventura, Yolo, and Yuba.

It is important to note that HPAI is widespread in California and may also be present in other counties that are not listed (due to having no lab submissions from those counties). Enhanced biosecurity is critical in the face of ongoing disease outbreaks. Please continue to practice good avian biosecurity protocols according to your plans. If you need assistance with reviewing your existing avian biosecurity plan or need help developing your plan, please contact our Secure Food Supply Program staff at sfspermits@cdfa.ca.gov.

Avian influenza is a highly contagious and often fatal disease in birds. The disease is spread through movement of infected or exposed birds, direct or indirect contact with infected wild and domestic birds or contact with virus on fomites (surfaces) such as hands, shoes, clothing, or feet and fur of rodents and other animals.

Report any unusual or suspicious sick or dead domestic, pet, or collection birds immediately via the CDFA Sick Bird Hotline at (866) 922-2473.

Report any unusual or suspicious wild bird deaths to the California Department of Fish and Wildlife (CDFW) online at www.wildlife.ca.gov/Conservation/Laboratories/Wildlife-Health/Monitoring/Mortality-Report. If you have questions about wildlife rehabilitation, please contact the CDFW directly.
