

## Extended Equine Certificate of Veterinary Inspection (EECVI) (Veterinarian Information)

The Extended Equine Certificate of Veterinary Inspection (EECVI) is a product by GlobalVetLink (GVL) that can be used for interstate movement instead of a traditional Certificate of Veterinary Inspection (CVI). An EECVI functions as a six (6)-month equine passport/movement document. Horses, mules, donkeys, zebras, or ponies that move frequently between states for show or exhibition purposes may use GVL's EECVI.

### Steps for vet to issue an EECVI:

### Please Note :

- Not all states participate in this program. In this case, a traditional CVI must be used. Check GVL's website for a list of participating states.
- The EECVI program should not be used for animals changing ownership.

For more information about the EECVI, including videos and Q&As, please visit GVL's website:
