

Arrival Protocol:

1. Haulers will stop outside the gate and telephone the office to announce their arrival, so that an employee can be sent to meet them.
2. Haulers will accurately complete the Visitor Log, including their Product Movement Permit number. *
3. Haulers will don company PPE from the PPE dispensary by the entrance gate.
4. A company employee will verify the PMP* and completion of biosecurity procedures.
5. Vehicle C&D will occur as the vehicle crosses the perimeter.

*Incoming loads that are not accompanied by a verifiable Product Movement Permit are not allowed to enter the premises.

Protocol for Haulers inside the Perimeter:

1. Haulers will be instructed to remain in the cab of their trucks whenever possible while on-site (inside the premises perimeter.)
2. If a hauler must exit the cab, disposable PPE will be used, which must include at minimum boot covers and a disposable coverall.
3. Vehicle windows will be kept closed whenever possible.
4. Loading and unloading of animals/animal products within the perimeter is to be completed by premises personnel whenever possible.

Exit Protocol:

1. All vehicles will undergo C&D at the vehicle wash station as they exit the premises gate.
2. Haulers will discard all used disposable PPE in the PPE receptacle provided at the gate.

General Hauler Protocols:

1. Animal pick-ups and deliveries will be single farm only.
2. All empty animal transport vehicles must be cleaned and disinfected prior to arrival at the premises for outgoing loads of poultry or eggs.
3. Vehicles delivering poultry to the premises (incoming loads) must be C&D prior to loading.
4. A commercial truck wash may be utilized when full vehicle C&D is necessary, including live bird transport racks/modules. Provide the name and address of any commercial truck wash used.
