

Whey Review Committee
Request from February 4, 2008 meeting
Item #23
Academic Studies relating to the Whey Factor

Upon conclusion of the Whey Committee, the Branch sent emails to Dr Bob Cropp, Dr A. M. Novakovic, Dr Mark Stephenson, Dr David Barbano, Dr Joe O'Donnell, John Umhoefer, Dr Dan Sumner, and Dr Phil Tong. We asked their assistance in helping identify any proposal/concept for determining the added value that the whey stream provides in the making of cheese.

Dr Tong wanted to review the agenda of speakers at a recent Conference he attended because he thought there might be some of interest. Thus far all the the responses from the other contacts have not materialized in any information that would be helpful to the Committee.
