

## Off-Season Irrigation System Maintenance

Date: \_\_\_\_\_

### General Maintenance:

- Have a pump efficiency test performed and implement recommended changes**
- Design and install irrigation systems so the water delivery does not exceed the capacity of the pipes**
- Repair and replace pipes, leaky valves, holes, and old fittings**
- Clean, repair, or replace filters and accessories as needed**

### Impact Sprinklers

- Size all of the nozzles to make sure they have the same diameter**
  - This can be done using various-sized drill bits
  - Replace worn nozzle
- Inspect the equipment and repair and replace as needed**
  - E.g. air vents, pressure relief valves, pressure regulators, valves, fitting gaskets etc.

Notes:
