# California Agricultural Exports 2017-2018 

## Califionne Agricultural Exportis

In 2017 California's agricultural exports totaled $\$ 20.56$ billion in value, representing an increase of 2.2 percent compared to the previous year. As indicated in the table below, California's agricultural exports have grown substantially over the past 10 years, despite slight contractions in 2009, 2015 and 2016.

California's top valued agricultural export commodity continues to be almonds, with a value of nearly $\$ 4.5$ billion in foreign sales in 2017. This figure, however, remained relatively flat compared to the previous year's figure. California dairy and dairy products recorded an export value of $\$ 1.6$ billion in 2017, ranking in second place and surpassing pistachios, which achieved 32.7 percent growth over the prior year with an export value of $\$ 1.52$ billion.

The principal 57 export commodities accounted for $\$ 17.86$ billion in export value in 2017 , or 86.8 percent of the total value of California's agricultural exports; the remaining 13.2 percent of exports were associated with "Other Products and Mixtures". Of the top 57 commodities exported, 21 showed an increase in export value of 5 percent or more, compared to the previous year, while 12 experienced a decrease in export value of 5 percent or more.

California's share of total U.S. agricultural exports for 2017 was 14.9 percent, which is about the same as the share realized last year. California's top 10 export destinations - the European Union, Canada, China/ Hong Kong, Japan, Mexico, Korea, India, United Arab Emirates, Turkey, and Vietnam - accounted for 70.0 percent of the 2017 export value. India showed the largest growth in total export value with a 32.5 percent increase compared to the previous year.

## Methodology

Data to compute agricultural exports are derived from official government sources, published industry sources, and unpublished information from the government and the industry. Export quantities and values of the whole U.S. and California port districts are from the Department of Commerce (DOC) trade data posted on the United States International Trade Commission (USITC) online database (http://dataweb.usitc.gov/). Canadian import (value) data are from Strategis Canada's online database (http:// strategis.ic.gc.ca/engdoc/main.html). If the California export price is not available for a particular product, we use the U.S. average export price for that commodity in order to provide a dollar value for exports.

Production quantities and values are from various National Agricultural Statistics Service (NASS), Economic Research Service (ERS), and Agricultural Marketing Service (AMS) publications. A share of the raw data provided in these USDA service publications are released

| California Agricultural Export Values, 2007-2017 |  |
| :---: | :---: |
| Year | Export Value <br> $\$ 1$ Billion |
| 2017 | $\$ 20.56$ |
| 2016 | $\$ 20.12$ |
| 2015 | $\$ 20.81$ |
| 2014 | $\$ 21.55$ |
| 2013 | $\$ 21.55$ |
| 2012 | $\$ 18.77$ |
| 2011 | $\$ 17.23$ |
| 2010 | $\$ 14.75$ |
| 2009 | $\$ 12.44$ |
| 2008 | $\$ 12.90$ |
| 2007 | $\$ 11.21$ |

as a preliminary report early in the calendar year followed by a more accurate final report released at a later date. For accuracy, The University of California Agricultural Issues Center (AIC) export estimates use data from final USDA reports.

AIC exports estimates use different methods from other sources, such as ERS. The ERS estimates are based on a state's national share of production of the exported commodity. The ERS method assumes that, for any particular commodity, a state's share of U.S. production equals that state's share of U.S. exports. Other sources use geographic port data, without direct links to where the product originated. The AIC export figures correspond to commodities that have been produced on farms and ranches within

California. Products originated in another state and exported via California ports are not included in these statistics.

In most cases, AIC reports exports at the individual commodity level. For instance, exports of a given fruit in fresh, canned, and dried forms are summed and listed under the name of the fruit, although the method for fresh fruit exports may differ from the method used for canned and dried fruit. The ratio of quantity exported to quantity produced is given on a farm weight basis. That means, for example, that wine is converted back into fresh grapes. Standard conversion factors published by the USDA are applied.

| California Agricultural Products Export Values and Rankings, 2015 2017 |  |  |  |  |  |  |
| :--- | :--- | ---: | ---: | ---: | ---: | :---: |

${ }^{1}$ Total export values for each year are rounded to the nearest million dollars. More precise values are used in the percent change calculations.
${ }^{2}$ Export values for 2016 were revised based on updated production data from the U.S. Department of Agriculture/National Agricultural Statistics Service.
${ }^{3}$ Hides and skins are included in the heading "Beef and Products".
${ }^{4}$ Export values for 2015 were revised based on updated production data from the U.S. Department of Agriculture/National Agricultural Statistics Service.
5 "Raspberries and Blackberries" category also includes exports of mulberries and loganberries.
6 "Total Principal Commodity" values for 2015 and 2016 were revised based on updates to U.S. Department of Agriculture/National Agricultural Statistics Service production data.

7 "Total Other Products and Mixtures" is composed of (a) highly processed products that are difficult to attribute to a specific commodity such as mixtures of fruits, nuts and vegetables and other processed foods; (b) categories for which the listed item does not provide data on individual commodities and (c) animal and plant products marketed in such small quantities that they are not included in the top 57 leading commodities.
8 "Total All Agricultural Export" values for 2015 and 2016 were revised based on updates to U.S. Department of Agriculture/National Agricultural Statistics Service production data.

| Total Other Products and Mixtures ${ }^{4}$ | 90,837 | 3.0 | 89,583 | 3.1 | 2.2 |
| Total U.S. Agricultural Exports ${ }^{5}$ | 134,673 | 14.9 | 138,175 | 14.9 | 0.2 |

${ }^{1}$ Hides and skins are included in the heading "Beef and Products".
2 Product category "Olives and Olive Oil" is equal to the product category "Olives and Products" found in previous years' data tables.
3 "Raspberries and Blackberries" category also includes exports of mulberries and loganberries.
4 Total "Other Products and Mixtures" is equal to "Total U.S. Agricultural Exports" minus "Total California Principal Commodity Exports".
${ }^{5}$ Total U.S. agricultural export values come from USDA. USDA defines agriculture to include: live animals, meat, and products of livestock, poultry, and Dairy products; hides and skins (but not leather products); animal fats and greases; food and feed grains and grain products; oilseeds and oilseed products; fruits, nuts, and vegetables and products of these; juices, wine, and malt beverages (not distilled spirits); essential oils; planting seeds; raw cotton, wool, and other fibers (not manufactured products of these); unmanufactured tobacco (not manufactured tobacco products); sugar and sugar products; coffee, cocoa, tea, and products of these; rubber and allied products; and stock for nurseries and greenhouses, spices, and crude or natural drugs. Fish, shellfish, and forestry products are not included in "agriculture".

${ }^{1}$ This table provides the total export value and export values for individual commodities to the top 15 destinations. Only commodities with export values greater than $\$ 2$ million to the destination are reported.
2 "Raspberries and Blackberries" category also includes exports of mulberries and loganberries.
${ }^{3}$ Hides and skins are included in the heading "Beef and Products".

|  | Total ${ }^{3}$ | 1,621 | 380 | 80 | 420 | 650 | 336 | 3,488 |

${ }^{1}$ The EU-28 members to which California exports are shipped reflect only the initial destination of the product, not the EU country of consumption.
Many products are distributed throughout the EU after the initial entry.
2 "Other Principal Products" are those that individually account for less than \$100 million in export value to the EU.
${ }^{3}$ Accurate export destination data is only available for 50 of the top 57 commodities. The commodities for which export destinations are not included are "Apples", "Chickens", "Eggs", "Mushrooms", "Seeds for Sowing", "Turkey" and "Wheat". Totals may not equal due to rounding.
${ }^{4}$ The other 18 EU members in 2017 and 2016 include Austria, Bulgaria, Cyprus, Croatia, Czech Republic, Estonia, Finland, Greece, Hungary, Ireland, Latvia, Lithuania, Luxembourg, Malta, Portugal, Romania, Slovak Republic, and Slovenia. These countries combined account for just over 4 percent of California agricultural exports to the $E U$ in 2016 and just over 5 percent in 2017.

[^0]:    ${ }^{1}$ This table shows destinations that receive shares of total exports greater than or equal to 5 percent of each commodity in either 2016 or 2017 for which reliable data are available.
    The commodities are listed in order of export value and the numbers in parentheses correspond to the 2017 ranking in the Table "California Agricultural Products Export Values and Rankings, 2015-2017."
    ${ }^{2}$ Accurate export destination data are only available for 50 of the top 57 commodities. The commodities for which export destinations are not included are "Apples", "Chickens", "Eggs", "Mushrooms", "Seeds for Sowing", "Turkey" and "Wheat".
    ${ }^{3}$ Hides and skins are included in the heading "Beef and Products".
    4 "Raspberries and Blackberries" category also includes exports of mulberries and loganberries.
    Source: University of California, Agricultural Issues Center.

[^1]:    ${ }^{1}$ Export quantities of processed goods were converted to farm fresh quantities using conversion factors published by UDSA ERS
    (https://www.ers.usda.gov/publications/pub-details/?pubid=41881) or annual conversion factors published by USDA NASS in annual crop summaries.
    ${ }^{2}$ Quantities for 2016 were revised based on updated production data from the U.S. Department of Agriculture/National Agricultural Statistics Service.
    ${ }^{3}$ Hides and skins are included in the heading "Beef and Products".
    ${ }^{4}$ Farm quantity exported for "Dairy and Products" is calculated by converting cheese, condensed milk, fluid milk, ice cream, nonfat dry milk, and whole dry milk to their fluid milk equivalents.
    5 "Grapes, All" includes grape juice, raisins, table grapes, and wine.
    6 "Raspberries and Blackberries" category also includes exports of mulberries and loganberries.
    7 The weighted average is based on each of the 53 commodity's share of production value. Values for "Chickens", "Flowers and Nursery", "Mushrooms" and "Seeds for Sowing" are not included because reliable data on export quantity is not available.
