CALIFORNIA AGRICULTURAL ORGANICS REPORT 2023 - 2024

Organics

California's organic agricultural industry plays an integral role in the state's economy. California continues to lead the nation in the number of organic farms, land in organic production, and organic sales. According to the United States Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS), California accounts for 32 percent of certified organic sales in the U.S. and organic sales continue to grow in the state¹. The California Department of Food and Agriculture's (CDFA) State Organic Program (SOP) is committed to upholding the integrity of products produced and sold in California as organic.

The SOP follows the USDA National Organic Program (NOP) guidelines and enforces the Organic Food Production Act of 1990 and the California Organic Food and Farming Act². The SOP assumes the NOP's oversight and enforcement authority in the state, and California is the only state in the nation with a NOP-authorized state organic program. These laws and regulations protect consumers, producers, handlers, processors, and retailers by establishing standards for agricultural products and foods that are labeled and/or sold as organic. The SOP's priorities are to protect the integrity of organic products produced and sold in California, while expanding outreach and education efforts to the organic community and the public. The SOP works to ensure that the organic food supply chain adheres to state and federal organic laws and regulations, so that California can maintain and continue to build consumer confidence in the organic industry.

The SOP also works in collaboration with organic industry leaders, representatives of the California Organic Products Advisory Committee, producers, handlers, processors, USDA Accredited Certifying Agencies (ACA), trade associations, county agricultural commissioners, and other organic industry stakeholders to continually improve the program.

California organic sales have increased by 21.7 percent from \$9.7 billion in 2019 to \$11.8 billion in 2023³. Of the \$11.8 billion in organic gross sales in California during 2023, producer gross sales accounted for \$4,619,113,863, handler gross sales accounted for \$5,801,248,935, and processor gross sales accounted for \$1,365,335,996. Conversely, California organic production site acreage has decreased by 13.0 percent from 2,051,249.17 acres in 2019 to 1,784,011.01 acres in 2023.

This report presents the five-year trend of organic sales, organic operation types, and organic production site acreage from 2019 to 2023, and provides detailed information regarding organic commodity harvested acreage and organic commodity producers for 20234. Highlights from the data indicate that total organic sales were reported at the highest level in 2021 at \$12,489,183,718, while total organic sales were reported at the lowest level in 2019 at \$9,686,680,228. Organic operation types were reported at the highest levels in 2021 and 2022 with 3,652 producers, 1,019 handlers, and 152 processors for 2021, and 3,582 producers, 1,075 handlers, and 166 processors for 2022, while organic operation types were reported at the lowest level in 2023 with 3,369 producers, 1,093 handlers, and 155 processors. Organic production site acreage was reported at the highest level in 2020 at 2,173,610.60 acres, while organic production site acreage was reported at the lowest level in 2023 at 1,784,011.01 acres.

METHODOLOGY

Through the registration process with CDFA, the SOP captures data related to production sites acreage, commodity harvested acreage, and gross sales for use in reporting to the organic industry, and for conducting enforcement activities of the SOP. The SOP registers every person

engaged in the state of California in the production and handling of raw organic agricultural products, and processors and handlers of processed organic meat, poultry, dairy products, and retailers engaged in processing or handling of products sold as organic. The SOP registers both operations certified by an ACA and operations exempt from certification with an ACA⁵.

Through the registration application process, operations are required to provide their total acreage per site/facility, which this report references as "production site acreage".

Additionally, operations are required to provide their harvested commodity acreage per county, which this report references as "commodity harvested acreage". This process allows the SOP to collect information for both organic production acreage and organic harvested acreage.

Data for gross sales for 2019 through 2023 is reported to the SOP by California SOP registrants, which includes USDA Certified Organic Operations and operations exempt from certification for organic producers, handlers, and processors.

Data for commodity harvested acreage per county is reported to the SOP by California SOP registrants from January 1, 2023 to December 31, 2023, and includes USDA Certified Organic producers and producers exempt from certification.

Data for commodity producers and production site acreage per county is reported to the SOP by California SOP registrants and includes USDA Certified Organic producers and producers exempt from certification.

All statewide data is collected from the following SOP reports: 2019-2023 Gross Sales Reports, 2019-2023 Commodity Harvested Acreage per County Reports, 2019-2023 Commodity Producers per County Reports, and 2019-2023 Production Site Acreage by County Reports.

For the purposes of registration, organic products are reported in accordance with the following regulation-specified categories:

- 1) Citrus,
- 2) Fruits, excluding citrus: strawberries (fresh

market); all other berries; pome fruit; stone fruit; grapes, table; grapes, wine; grapes dried, raisins; all other fruits.

- 3) Livestock or dairy: fluid milk, cow; all other dairy and dairy products; cattle, beef; chicken, broilers; chicken, layers; all other poultry/livestock and products,
- 4) Nuts: almonds; all other nut crops,
- 5) Vegetables: lettuce (head, leaf, spring/salad mixes); broccoli; carrots; spinach (fresh and processed); celery/celeriac; tomatoes; all other vegetables, and
- 6) Other, which includes, but is not limited to, apiculture, organic fallow ground, herbs, mushrooms, cut flowers, and nursery: propagation; seed crops; all other field crops (includes pasture and rangeland); all other not previously reported or listed; fallow.

The California Agricultural Statistic Review is a compilation of data from various sources including USDA NASS, USDA Economic Research Service, County Agricultural Commissioners, UC California Agricultural Issues Laboratory, and CDFA, each having a separate methodology. As such, there may be discrepancies when directly comparing data presented in this section to the data presented in another section of this report.

- 1 USDA NASS 2021 Certified Organic Survey.
- 2 Formerly the California Organic Products Act of 2003.
- 3 This percentage change is calculated using the following total organic sales figures from the tables presented below: \$9,686,680,228 for 2019 and \$11,785,698,794 for 2023; "\$9.7 billion in 2019 to \$11.8 billion in 2023" are rounded figures.
- 4 2022 organic production acreage figures are updated from previous reports with the most recent information made available.
- 5 This report does not include differences between operations certified by an ACA and operations exempt from certification, as the percentages presented in the previous report did not yield significant differences.

Producer is defined as the entity that engages in the business of growing or producing organic food, feed, or fiber.

Note: Broad variances in data from year-to-year may be attributed to singular or few operations that are highly representative in organic sales.

Statewide totals include data withheld from individual counties to avoid disclosure of individual operations.

D Withheld to avoid disclosure of individual operations. Represents counties with five or less operations.

Handler is defined as any person or entity that packs, repacks, labels, sorts, or otherwise handles, including comission merchants or brokers, any organic product that is outside the jurisdiction of the California Department of Public Health.

Note: Broad variances in data from year-to-year may be attributed to singular or few operations that are highly representative in organic sales.

Statewide totals include data withheld from individual counties to avoid disclosure of individual operations.

D Withheld to avoid disclosure of individual operations. Represents counties with five or less operations.

Chicken, Layers	3,468.42	150
Chicken, Broilers ¹	2,977.88	68
All Other Dairy and Dairy Products ^{9,1}	2,741.54	33
Statewide Total ¹⁰	2,454,662.69	13,958

¹ "Harvested acreage" for livestock and dairy products refers to the area utilzed for production of these commodities.

² All other field crops includes all other field crops including pasture and rangeland.

³ All other vegetables includes all other vegetables except for broccoli, carrots, celery/celeriac, lettuce (head, leaf, spring/salad mixes, spinach (fresh and processed), and tomatoes.

⁴ All other fruit crops includes all other fruit crops except for citrus, grapes (table), grapes (wine), grapes dried (raisins), pome fruit, stone fruit, strawberries (fresh market), and all other berries.

 $^{^{\}rm 5}$ $\,$ All other nut crops includes all other nut crops except for almonds.

⁶ All other not previously reported or listed includes any crop that falls outside of the the other catagories.

All other berries includes all other berries except for strawberries.

⁸ All other poultry/livestock and products include all other poultry/livestock and products except for cattle (beef), chicken (broilers), and chicken (layers).

⁹ All other dairy and dairy products include all other dairy products except for fluid milk (cow).

Statewide total producer count represents the total production count per commodity. The total producer count in this table is not representative of individual producer operations, as operations may produce one or more commodities.

Producer count represents the production count per commodity. Producer count in this table is not representative of individual producer operations, as operations may produce one or more

All other berries includes all other berries except for strawberries.

All other dairy and dairy products include all other dairy products except for fluid milk (cow).

All other fruit crops includes all other fruit crops except for citrus, grapes (table), grapes (wine), grapes dried (raisins), pome fruit, stone fruit, strawberries (fresh market), and all other berries.

All other nut crops includes all other nut crops except for almonds.

⁷ All other poultry/livestock and products include all other poultry/livestock and products except for cattle (beef), chicken (broilers), and chicken (layers).

⁸ All other vegetables includes all other vegetables except for broccoli, carrots, celery/celeriac, lettuce (head, leaf, spring/salad mixes, spinach (fresh and processed)), and tomatoes.

 $^{^{9}}$ All other not previously reported or listed includes any crop that falls outside of the the other catagories.

 $[\]textit{D} \quad \textit{Withheld and moved to the end of each section to avoid disclosure of individual operations. Represents counties with five or less producers. } \\$

¹ Producer count represents the production count per commodity. Producer count in this table is not representative of individual producer operations, as operations may produce one or more commodities.

All other vegetables includes all other vegetables except for broccoli, carrots, celery/celeriac, lettuce (head, leaf, spring/salad mixes, spinach (fresh and processed), and tomatoes.

All other fruit crops includes all other fruit crops except for citrus, grapes (table), grapes (wine), grapes dried (raisins), pome fruit, stone fruit, strawberries (fresh market), and all other berries.

 $^{^{\}rm 4}$ $\,$ All other field crops includes all other field crops including pasture and rangeland.

⁵ All other berries includes all other berries except for strawberries.

⁶ All other not previously reported or listed includes any crop that falls outside of the the other catagories.

All other nut crops includes all other nut crops except for almonds.

⁸ All other poultry/livestock and products include all other poultry/livestock and products except for cattle (beef), chicken (broilers), and chicken (layers).

⁹ All other dairy and dairy products include all other dairy products except for fluid milk (cow).

 $D\quad \textit{Withheld and moved to the end of each section to avoid disclosure of individual operations}. \textit{Represents commodities with five or less producers}.$

Statewide totals include data withheld from individual counties to avoid disclosure of individual operations.

D Withheld to avoid disclosure of individual operations. Represents counties with five or less operations.

Note: Broad variances in data from year-to-year may be attributed to singular or few operations that are highly representative in organic acreage. Variances in organic acreage trends year-to-year may differ from variances in conventional acreage trends for a variety reasons. As such, trend analysis should consider organic-specific factors when analyzing organic acreage trends such as cost, consolidation, or other contributing factors
