

Livestock and Dairy

California's total livestock and livestock products cash receipts were \$10.6 billion in 2008, down almost 2 percent from 2007. California continued to rank second nationally, accounting for 7.5 percent of livestock cash receipts. Milk, cattle, and chickens remain the state's leading commodities despite cash receipts declining for milk and aquaculture from 2007.

The Golden State's dairy industry faced production and financial challenges in 2008. The year started with continued growth in milk production. The month of March recorded the highest single month of production at 3.64 billion pounds. Fluid milk product demand was flat forcing plants to convert the increasing supply into butter and powder as well as shipping some out of state for processing. Inadequate plant capacity forced plants and producers to scramble to find homes for the excess production. Reducing milk supply became the focus of the dairy industry with cooperatives and other processors initiating production base caps. The last half of the year had a net decrease in milk production when compared to the same period of 2007. The average percent growth in production for the prior five years was 3.1 percent, while the 2008 percent growth was only 1.3 percent due to the production reduction efforts in the latter part of 2008. Record setting high feed and energy costs were mitigated for the first three quarters as the average prices paid to producers were close to the record setting prices of 2007. By the end of 2008 the prices received had dropped to below cost of production. In 2008 the average prices paid to producers decreased 6 percent. Dairies continued to relocate to other state or shut down completely with a net loss of 99 California dairies in 2008.

California has been the nation's leading dairy state since 1993 when it surpassed Wisconsin in milk production. Sales of milk and cream contributed \$6.92 billion in 2008. Wisconsin, New York, Idaho, and Pennsylvania were the next leading states in total milk production. California ranked number one in the U.S. in the production of fluid milk, butter, ice cream, and nonfat dry milk. California was second in total cheese production.

California's dairies produced 41.2 billion pounds of milk, accounting for 22 percent of the nation's milk supply. For the second year in a row, all 12 months of 2008 recorded more than 3.1 billion pounds in milk production. Approximately 43 percent of all the Golden State's milk was used to make cheese, down 4 percent from 2007.

According to the California Department of Food and Agriculture's Dairy Statistics Branch, 35 counties contributed to the state's market milk production. The top five milk-producing counties in California were Tulare (26 percent), Merced (14 percent), Stanislaus (10 percent), Kings (10 percent), and Kern (9 percent). These counties accounted for 69.5 percent of the state's total milk production in 2008. Sales of fluid milk in California

averaged 33 percent whole milk, 36 percent reduced fat milk, 15 percent low fat milk, and 16 percent skim milk.

Milk production per cow decreased 0.4 percent in California to 22,344 pounds and the number of dairy cows in the state rose to 1.84 million head. California cheese production has nearly doubled in the past three decades, from 1.17 billion pounds in 1976 to 2.11 billion pounds in 2008. California's total cheese production was down over 7 percent from 2007. United States cheese exports increased 32 percent from 2007, to 131 thousand metric tons per the USDA Foreign Agricultural Service. Butter exports also increased by 256 percent in 2008. Strong demand and a weak dollar coupled with competitive pricing contributed to the surge in US dairy product exports.

Cash receipts for cattle and calves increased 2 percent from 2007, to continue the previous seven year upward trend, excluding the 2006 dip. The 2008 sales totaled \$1.82 billion, compared with \$1.78 billion in 2007. Receipts for hogs and pigs were nearly 5 percent above the previous year. Sheep and lambs declined 13 percent from 2007 continuing the recent trend.

California's 2008 honey production, at 18.4 million pounds, was 35 percent above 2007. Producing colonies totaled 360 thousand, up 6 percent from the previous year. The yield per colony averaged 51 pounds, compared to 40 pounds produced in 2007. The average price per pound was 141 cents per pound, 37 cents higher than 2007.

**California Livestock, Dairy,
Poultry, and Apiary Cash Income**

Total	10,818,548	10,632,246	-2

In November 2008 California voters passed Proposition 2, requiring livestock operations to implement new space requirements for cages that hold calves raised for veal, egg-laying hens and pregnant pigs. Producers have begun to respond by decreasing breeding hogs and egg-laying hens to accommodate the enclosure restrictions, although full compliance is not mandated until January 1, 2015.

1/ Steers and heifers over 500 pounds (including fed cattle) and slaughter cows.

2/ Steers and heifers (all qualities) over 500 pounds (including fed cattle).

3/ Beef cows and cull dairy cows sold for slaughter.

4/ Steers and heifers (all qualities) under 500 pounds

Grazing Fee Annual Average Rates, 1999-2008 1/

Year	Per Animal Unit 2/	Cow-Calf	Per Head
	<i>Dollars Per Month</i>		
1999	12.10	15.00	12.50
2000	12.30	15.50	12.70
2001	13.00	16.00	13.50
2002	12.80	16.50	14.00
2003	13.50	17.50	14.30
2004	14.50	19.50	15.50
2005	15.40	20.50	17.00
2006	16.50	21.00	17.00
2007	16.50	21.50	17.30
2008	17.80	22.10	18.50

1/ The average rates are estimates based on survey indications of monthly lease rates for private, non-irrigated grazing land from the January Cattle Survey.

2/ Includes animal unit plus cow-calf rates. Cow-calf rate converted to animal unit (AUM) using (1 aum=cow-calf *0.833).

2,008										

1/ An operation is any place having one or more head of milk cows, excluding cows used to nurse calves, on hand at any time during the year.

Percent of inventory reflect average distributions of various surveys conducted during the year.

2/ Data will only be published during the Census of Agriculture which is every five years.

1/ Preliminary 2008 data.

2/ Excludes processed cheese and cottage cheese.

3/ Includes Cheddar, Colby, washed curd, stirred curd, Monterey, and Jack.

4/ Includes all cheeses not included in the above categories.

5/ Includes low fat and nonfat cottage cheese. Fat content is less than 4 percent.

6/ Contains minimum milk-fat content of 10 percent and not less than 4.5 pounds per gallon.

7/ Includes hard, soft-serve, freezer-made milkshake, and freezer-made "milk drink."

Contains less than 10 percent milk-fat required for ice cream.

8/ Not shown when fewer than three plants reported or individual plant operations could be disclosed.
