Tim Pelican, Stanislaus
County
Gerald Brockman, USDA

CALL TO ORDER

Chairman Wayne Winslow called the Shell Egg Advisory Committee (SEAC) meeting to order at 10:03 a.m. and a quorum was established.

APPROVAL OF MINUTES

Mr. Winslow asked the Committee to review the minutes from the February 17th meeting.

MOTION: A motion was made by Mr. Gary Foster to amend the previously adopted motion to accept the minutes. Mr. David Will seconded the motion. The motion passed unanimously.

DISCUSSION: REGULATION LANGUAGE FOR RE-PACKING AND RE-GRADING

Chairman Wayne Winslow wanted to begin with item four on the agenda, as there were representatives from the United States Department of Agriculture (USDA) there to take part in the discussion. Mr. Winslow began with the proposed regulation language, and why it was reworded when it was submitted to the Executive Office. Mr. Herrera explained it was reworded in order for the average egg registrant to understand. He continued to explain that the language was there, but just in a different format.

Mr. Herrera explained re-grading and re-packing definitions were just the bare minimum and that a more in depth definition would be included in the language as soon as re-packing, re-grading and processed terms were agreed upon.

Mr. Herrera began with the “processed” term, and said it was a shell egg that has been cleaned, candled, graded, sized, and placed in containers. When that language was sent out for comment, one of the things that was proposed is the addition on the word sanitized being added to the definition; as most big companies already sanitize eggs when they are being packed, and smaller companies should practice that as well.

Mr. Herrera continued on to Section 1352.4 (a) of the proposed regulations, stating he wanted to limit a re-grade to an operation that has the authority to process eggs. Mr. Mike Gemperle asked that if one of the listed things (cleaned, sanitized, candled, graded, sized and placed in containers) did not take place then the eggs technically aren’t processed, in which Mr. Herrera confirmed.

Mr. Steve Mahrt asked about the usage of new cartons versus cleaned cartons, in which Mr. Winslow and Mr. Gemperle stated the Egg Quality Assurance Program required the usage of new cartons and flats. Mr. Winslow asked Mr. Gerald Brockman about USDA’s position on the reusing of cartons and flats, and Mr. Brockman answered that it can be clean used. Mr. Winslow then stated that the regulations set forth by the Department should mirror those set forth by USDA. Mr. Herrera said that cartons were okay to be reused at farmer’s markets if all previous information, with the exception of Keep Refrigerated, Eggs, and One Dozen, was obliterated.

After much discussion, Mr. Herrera read the definition of processed as follows: “Shell eggs that have been washed, cleaned, sanitized, candled, graded, sized and placed into containers.” Mr. Winslow asked the committee if re-grade definition is needed, in which the committee discussed and defined.

MOTION: A motion was made by Mr. Steve Mahrt to accept the processed definition as stated above. Mr. Michael Gemperle seconded the motion. The motion was passed unanimously.

MOTION: A motion was made by Mr. Gary Foster to amend the previously adopted motion that by definition, re-grade shall mean processed. Mr. Steve Mahrt seconded the motion. Mr. Michael Sencer abstained. The motion was passed.

Mr. Winslow then moved on to the definition of re-pack, mentioning Section 1352.4(b). The group spoke about the original plant identification number, and questioning whether both the original and repacking company’s numbers need to be included on the new label.

MOTION: A motion was made by Mr. Michael Gemperle that definition of 1352.4(b) is as follows: Registered producers and wholesalers may repack eggs into overwraps, flats, or hand sort into clean containers. Clean containers shall be labeled with original Julian pack and sell-by dates, and the re-packer plant identification number. Mr. Steve Mahrt seconded the motion. Mr. Michael Sencer abstained. The motion was passed.

Mr. Herrera then spoke about 1352.4(c), confirming the language. Mr. Steve Mahrt had a concern that the original container is more often than not damaged along with the eggs, and should not be in the original container.

MOTION: A motion was made to amend the previously adopted motion. Mr. Gary Foster stands by his original motion that the last five words from 1352.4 (c) be stricken from the definition, so it reads as follows: Registered egg handlers who also act as a retailer shall only replace damaged or dirty eggs with clean, undamaged eggs from the same lot. Mr. David Will seconded the motion. The motion passed unanimously.

Mr. Herrera spoke of 1358.4 (c), asking about the definition and if any changes should be made. The group discussed, and decided re-grading should be stricken from the definition. The definition should be as follows: Egg handlers shall maintain records of the original plant where the eggs were first processed for not less than one year from the date of original processing.

MOTION: A motion was made by Mr. Gary Foster that 1358.4 (c) should be defined as stated above. Mr. Michael Sencer seconded the motion. The motion was passed unanimously.

MOTION: A motion was made by Mr. David Will that 1352.4 (a) should be taken out all together. Mr. Steve Mahrt seconded the motion. The motion was passed unanimously.

Mr. Herrera then said regulation language would be rewritten to reflect all changes made today on definitions. It would then be sent out for comments, and then sent to the legal office of the Department for approval.

DEPARTMENT/DIVISION/BRANCH UPDATE

Mr. Dave Preciado began by stating the Department would be taking a 2.5 million dollar reduction, based on current revenue. It is still being discussed where and how the Department will be making cuts. The division has lost ten positions in the last year because of budget cuts, and in the upcoming fiscal year would have to lay off an additional two to three staff to accommodate the new budget. It was stated that even though the Egg Program is not general fund, but agricultural fund, cuts would still be considered, but justifications can be made for staff.

He continued on the Food Safety regulations, stating they are currently in the Executive Office being reviewed by the legal office, and should be out for public notice in roughly two weeks.

DRAFT REGULATION LANGUAGE FOR CERTIFICATE OF MOVEMENT

Mr. Herrera discussed the draft addition to Egg Regulations, and suggested companies receiving egg shipments should notify the Department when eggs have been delivered. Mr. Glenn Hickman asked what kind of penalties would be enforced if shipments are found without previously notifying the Department. Mr. Herrera stated the eggs would be held off sale until the completed certificate is submitted. In addition, the shipper and receiving companies would be penalized.

After discussion by the committee, Mr. Wayne Winslow suggested 1358.6 (1) and (2) of the Draft of the Certificate of Movement should be removed, due to being already mentioned in previous regulations. The committee agreed.

Mr. Herrera suggested Mr. Winslow appoint SEAC members to draft verbiage for regulations. Mr. Richard Jenkins, Mr. Michael Gemperle, Mr. Gary Foster and Mr. Mike Sencer were chosen to develop the Certificate of Movement form and language.

ESQM OVERVIEW

Mr. Herrera began with a power point presentation showing counties contracted with the program. He followed with locating the grading stations, wholesalers and distributors, Shell Egg Surveillance locations, producers with 3000 laying hens or more, and finally producers with 3000 laying hens or less. Mr. Winslow complimented Mr. Herrera, stating the presentation was an eye-opener to the committee on how many registrants are in the state.

FY 2012/13 AND FY 2013/14 BUDGET

Mr. Herrera segued into the budget, stating they program is requesting an increase in the budget. He is requesting an increase in the assessment rate from \$0.05 to \$0.06. Mr. Herrera then spoke about the new staff for the program, including CASS employees, as well as a veterinarian position.

After much discussion with the committee and Mr. Herrera, including the committee wanting a breakdown of staff, audit amounts, liquid egg product revenue, and other various costs it was agreed that an additional meeting would be needed to review the budget.

NEXT MEETING

The next SEAC meeting will be held in Sacramento June 19, 2012 from 10:00 am to 2:00 pm to discuss the budget.

ADJOURN

MOTION: Mr. Winslow adjourned the meeting at 1:29 p.m.
