840 Tags

A 'button' type Radio Frequency Identification Device (RFID) or visual 'bangle' type tag or combination RFID/bangle. These types of tags have a unique 15-digit number beginning with 840, are tamper evident and bear the US shield. 840 tags may only be applied to cattle born in the US. A Standardized National Premises Identification Number (PIN) is required to purchase '840' tags or devices.

Silver/ 'Brite' or NUES Metal Tags

Producers can order free National Uniform Eartagging System (NUES) tags from local CDFA Animal Health offices and apply them themselves. Accredited veterinarians can apply these tags for disease testing or animal identification for movement.

Brucellosis or 'Bangs' Tags (Female Cattle Only)

Accredited veterinarians can apply orange metal or RFID tag at time of brucellosis vaccination in heifers.
