

## Quarterly Reports

In accordance with Food and Agricultural Code 9212.5, CDFA calculates the total estimated amount of canine blood sold in California each quarter by community blood banks and, separately, the total estimated amount of canine blood that closed-colony blood banks sold in the state. This information, along with annual totals, is posted on this website.

CDFA will discontinue its licensing program for commercial blood banks for animals that produce canine blood and blood component products sourced from captive closed-colony dogs within 18 months of making a finding that community blood banks sold an annual amount of canine blood in California that equals or exceeds the annual amount closed-colony blood banks sold in four consecutive quarters. CDFA will provide notice on the department's internet website when this happens.
