ACP DETECTION

PROGRAM BOUNDARY

Current Infested Counties

- San Diego County - Southern portion – 145 infested sites.
- Imperial County – Imperial Valley area – 508 infested sites.
- Orange County – Small urban area in Santa Ana – 7 infested sites.
- Los Angeles County – Large urban area in central and eastern part of the county – 1,377 infested sites.
- Total infested sites in California – 2,037.

ACP Treatment Update

- Treatment of host plants is conducted up to a 400 meter radius around all ACP find properties. Currently treating an 800 meter radius around East Los Angeles.

- Number of Properties Treated:

■ Imperial County	10,052
■ Los Angeles County	25,555
■ Orange County	534
■ San Diego County	2,366
■ Total:	38,507

Public Meetings

To date, CDFA has held 46 public meetings

ASIAN CITRUS PSYLLID-HLB FUTURE PROGRAM

California Department of Food and Agriculture

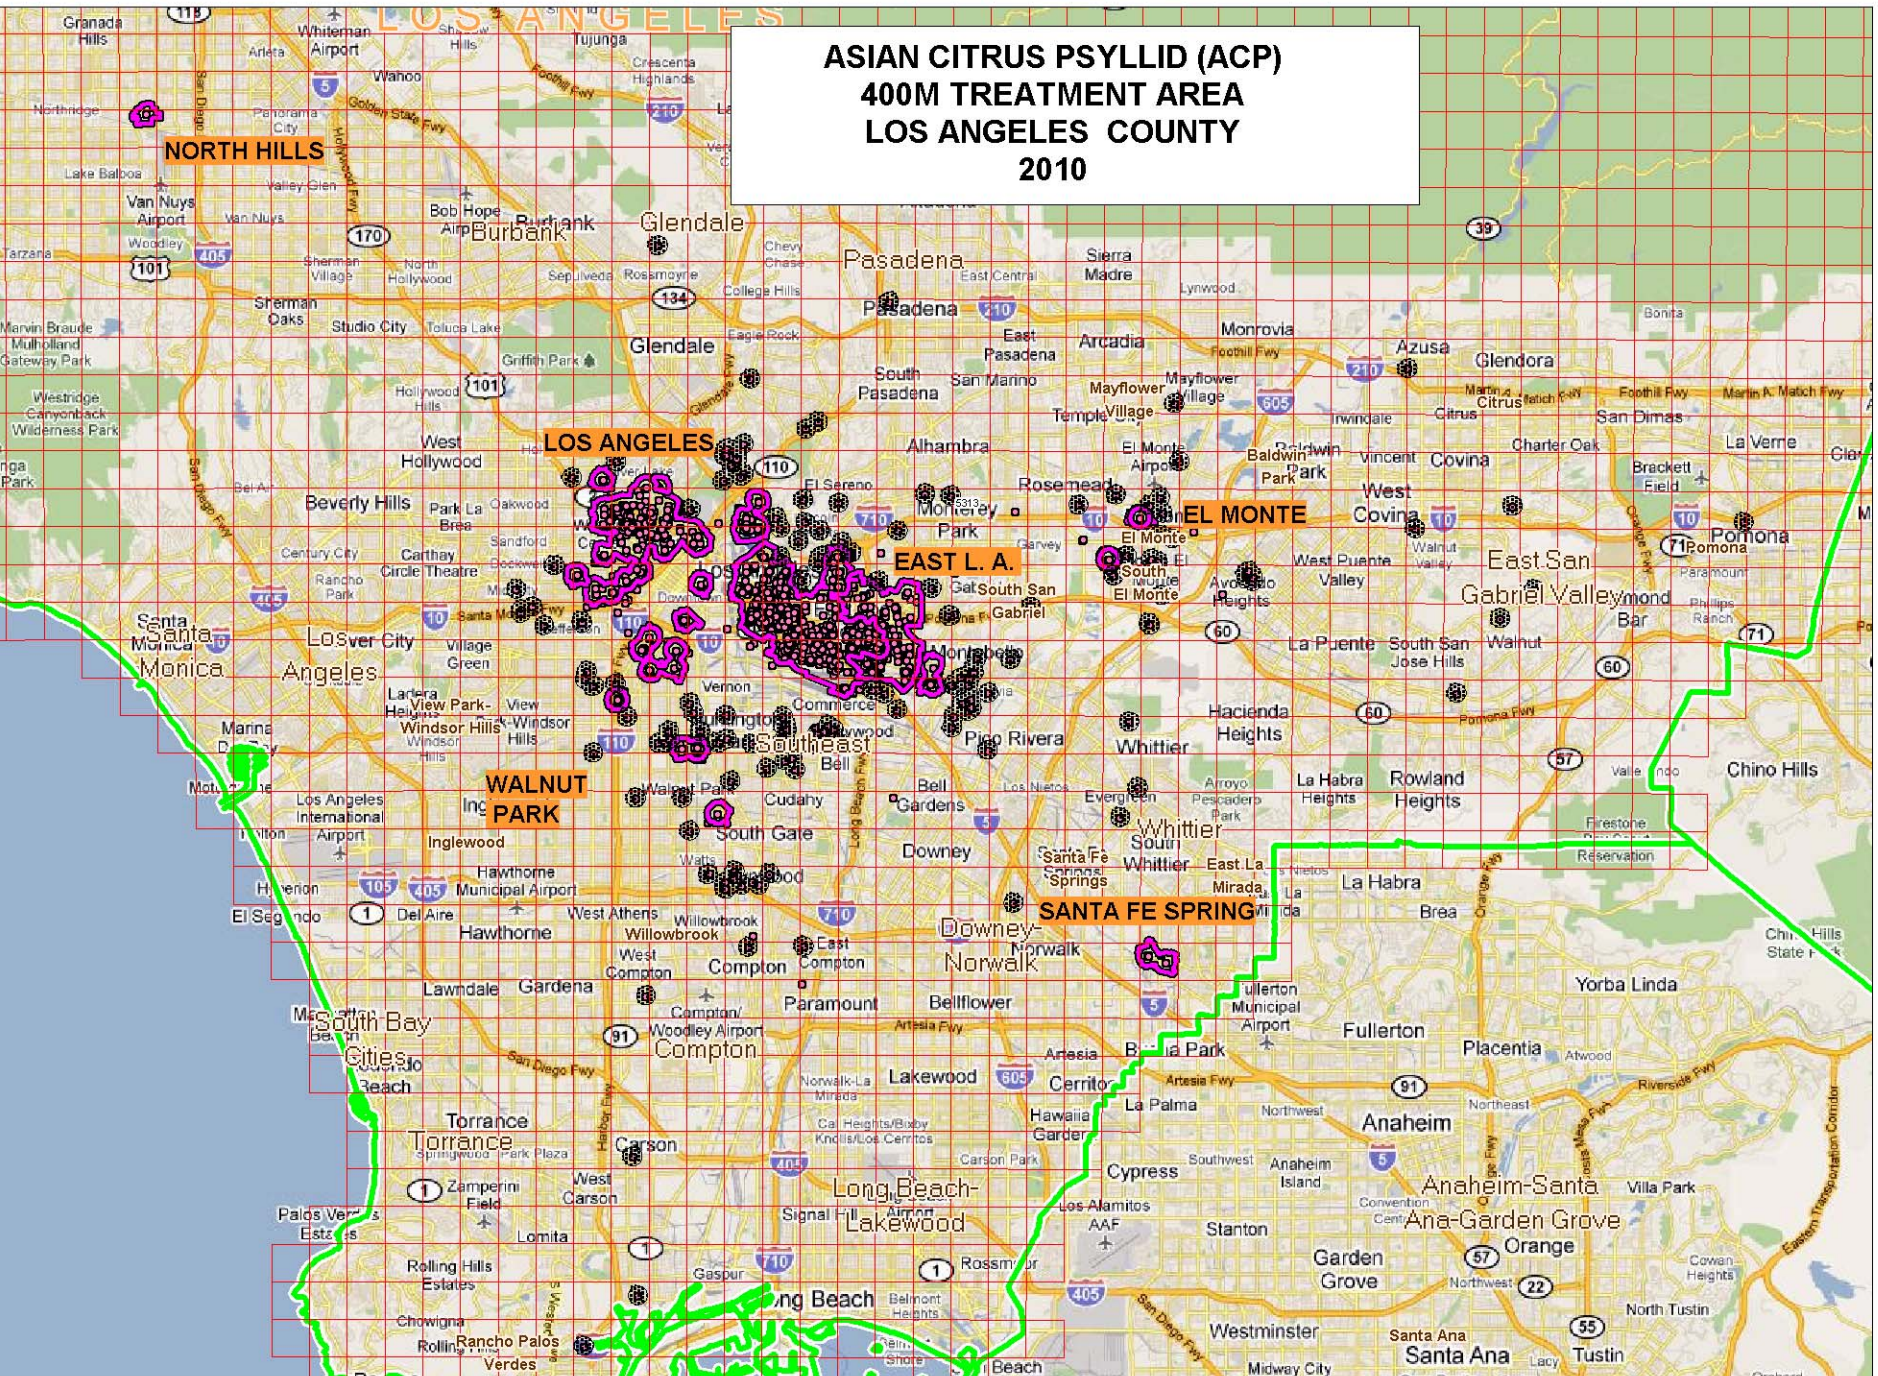

Budget Projections

- Goal: Treat 400 meters around all detection sites in Imperial, San Diego, and Los Angeles Counties.
- Parameters:
 - The attached budget is for one treatment 400 meters around current detection sites (including repeat sites).
 - The budget does not include treating 400 meters around new detection sites.
 - The number of potential properties requiring treatment is based on data obtained from CDFFA's current treatment program.

Budget Projections Cont...

- On average, one crew is able to treat 15 properties per day.
- A CDFA treatment truck requires three CDFA employees (notifier, hose puller, and applicator).
- A Contractor treatment truck requires two CDFA employees (notifier and spotter).
- Each treatment truck is assigned a pre-notifier (identifies/records citrus trees in the block folder and notifies residents of treatment 48 hours in advance of the scheduled treatment).
