### Alameda County Dog Team Interception

**PDRs: 010P06556468-6469**

On August 4, 2016, Alameda County Dog Team Inspector/Handler Lisa Sampson with dog Cosmo intercepted an unmarked box from Florida at the USPS facility in Oakland.

Alameda County Inspector Chris Craft obtained permission from the shipper to open the box for inspection.

The box contained curry leaves, curry fruit, and mango fruit. Inspector Craft confiscated the parcel due to multiple quarantine violations. Upon inspection, pests were found on the curry leaves and fruit.

The mango fruit was inspected, but there was no evidence of pest activity on the interior or exterior of the fruit. Samples of curry leaves with fruit were submitted to the PPD Laboratory and pests were identified as A-rated *Anastrepha suspensa* (Caribbean fruit fly) and Q-rated Diaspididae (armored scale).

**About Mexican tarragon<sup>1/</sup>:** “*Tagetes lucida* is native to Mexico and Guatemala and loves the heat and humidity, providing abundant leaves for cooking all summer. The flavor of Mexican tarragon is a bit spicier than that of French tarragon, having an accent of cinnamon in addition to the sweet licorice taste normally associated with tarragon. It can be used in the same manner as French tarragon and gives whatever dish it is in an extra dimension of zest.

Mexican tarragon is also called Spanish tarragon or Mexican mint marigold. It is related to the marigolds we grow as summer annual bedding plants. This becomes apparent in late summer and fall when these plants burst into bloom with clusters of bright gold flowers. The pretty yellow flowers are a tasty and beautiful addition to fresh green salads.”

<sup>1/</sup> Friday, T. (2008, November).

Mexican Tarragon is the marigold of the herb garden.
