

DATE: September 28, 2016
TO: All County Agricultural Commissioners
FROM: Plant Health and Pest Prevention Services
SUBJECT: **AQW Pest Report No. 36-2016**
Weekly AQW Report: For the week of September 01-07, 2016

Attached is the report for all A, Q and W pests intercepted or detected in California from September 1-7, 2016. Pests are identified by the California Department of Food and Agriculture's Plant Pest Diagnostics (PPD) Laboratory.

Santa Clara/Contra Costa County Dog Team Interception

PDR: 430P06135712

On August 31, 2016, Contra Costa County Dog Team Inspector/Handler Cecilie Siegel with dog Conan intercepted an unmarked and uncertified package from Wisconsin at the USPS in San Jose.

Permission was obtained from the receiver to open the package for inspection. The package contained white oak cuttings.

White oak cuttings from Wisconsin, photo courtesy of Santa Clara County

Upon inspection of the white oak cuttings, Santa Clara County Agricultural Biologist Julius Calso and Paulo Philippidis found some larvae coming out of the bark.

Pest samples were submitted to the PPD Laboratory and identified as Q-rated Cerambycidae.

A notice of rejection was issued for the following violations and the shipment was destroyed.

- Federal Domestic Quarantine for Emerald Ash Borer, Federal Code of Regulations (CFR) [Section 301.53](#)
- State Exterior Quarantine for Chestnut Bark and Oak Wilt Diseases, California Code of Regulations (CCR) [Section 3251](#)
- California Food and Agricultural Code (FAC) [Section 6461.5](#) (live pests)
- California FAC [Section 6421](#) (lack of markings)

Wood Chipper Infested with Pests Rejection!

PDR: TR0P06120833

On August 23, 2016, a commercial truck carrying a wood chipper from New Hampshire entered the Truckee Border Protection Station. Upon arrival the shipment was sent to a secondary inspection area for a physical inspection. During the inspection, Inspector Ryan McKenna and Supervisor Ernando Ortiz intercepted several live ants mixed in the debris on the wood chipper. The shipment violated the California FAC [Section 6461.5](#) (live pests) and, as a result, the shipment was issued a notice of rejection (form 66-071).

The specimens collected were sent to the PPD Laboratory by email via digital imaging and were tentatively identified as Q-rated pests. The options for the shipment were explained to the driver, and the shipment went back out of state where the driver pressure washed all the debris and rid the shipment of the ants. The shipment returned to the Truckee station and upon re-inspection live ants and debris were again found in the wood chipper and the shipment was rejected a second time. Upon returning back out of state, the driver had the shipment cleaned professionally (washer) to eradicate the shipment of pests and debris. For final disposition, the shipment was re-inspected a second time with negative pest findings and was released on to California destination.

Specimens collected were submitted to the PPD Laboratory and identified as Q-rated *Camponotus pennsylvanicus* (black carpenter ants).

Left- Wood chipper from New Hampshire that was rejected at the Truckee Station with live ants.
Right- close-up of wood chipper and debris. Bottom right- digital image of black carpenter ant intercepted by Inspectors Ortiz and McKenna.

About *Camponotus pennsylvanicus*^{1/}: the black carpenter ant, is one of the best known, most adaptable, and perhaps the most common of carpenter ants in the eastern and central United States. This ant, described in 1773, is also interesting historically because it was the first native North American ant species to be named.

^{1/} MacGown, J., Brown, R., Hill J., Layton, B.(2007, August). Carpenter Ants of Mississippi. Retrieved from [Ant Bulletin - Mississippi Entomological Museum - Mississippi](#)

More about *Camponotus pennsylvanicus*^{2/}: This is a very common ant that nests in live and dead trees, rotting logs and stumps, and in wood products such as fences, telephone poles, buildings, and sometimes in the soil. Mature nests may have several thousand workers. Due to their habit of nesting in man-made structures, this species can cause serious damage making it a serious economic pest.

Los Angeles County Interception

PDR: 190P06060229

On September 2, 2016, Los Angeles County Inspectors Laura Kopase and Huy Nguyen were conducting an inspection of 1,232 cartons of purple sweet potatoes from Hawaii at YW International wholesale dealer.

All cartons showed the proper treatment stamps (irradiation) and all permits were present.

However, 12 cartons were damaged and/or poorly sealed; these were selected for internal inspection due to the possibility of post-treatment infestation.

Upon inspection of the 12 compromised cartons, a semi-slug was found on the purple sweet potato. The slug was submitted to the PPD Laboratory for Identification and identified as A-rated *parmarion martinsi* (semi-slug).

A notice of rejection was issued for violation of California FAC [Section 6461.5](#) (live pests) and 12 compromised cartons were confiscated and subsequently taken for deep burial at a local landfill.

All properly sealed and undamaged cartons were released to enter commerce.

Fresno County Dog Team Interception

PDR: 100P06282620

On August 31, 2016, Fresno County Dog Team Inspector/Handler Samantha Tomlinson with dog Soya and Inspector Lilliana Reyes intercepted a marked and certified box from Hawaii at FedEx Air in Clovis. The box contained pineapples (fruit).

Upon inspection of the pineapples, Inspector Reyes found some suspect pests on the fruit.

Pest samples were submitted to the PPD Laboratory and identified as Q-rated *Pheidole megacephala* (bigheaded ant) and Q-rated Pseudococcidae (mealybug).

A notice of rejection was issued for violation of California FAC [Section 6461.5](#) (live pests) and the shipment of pineapples were destroyed.
