

CALIFORNIA DEPARTMENT OF
FOOD & AGRICULTURE

Karen Ross, Secretary

DATE: December 21, 2016

TO: All County Agricultural Commissioners

FROM: Plant Health and Pest Prevention Services

SUBJECT: **AQW Pest Report No. 46-2016**
Weekly AQW Report: For the week of November 10-16, 2016

Attached is the report for all A, Q and W pests intercepted or detected in California from November 10-16, 2016. Pests are identified by the California Department of Food and Agriculture's Plant Pest Diagnostics (PPD) Laboratory.

Fresno County Dog Team Interception

PDR: 100P06282581-2582

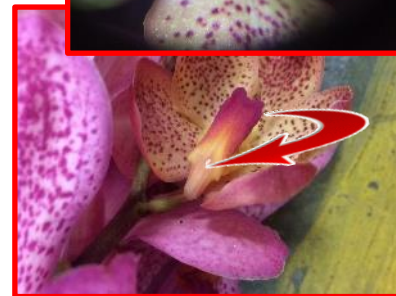

On November 11, 2016, Fresno County Dog Team Inspector/Handler Samantha Tomlinson with dog Soya and Inspectors Kori Peterson and Loreen Whitfield intercepted a marked and certified box from Hawaii at FedEx Air in Clovis.

The box contained *Phalaenopsis amabilis* (moth orchid) and *Calathea burlemarxii* (green ice calathea) cut flowers.

Upon inspection of the cut flowers, Inspector Peterson and Whitfield found some suspect pests inside the flowers and near the base.

Pest samples were collected and submitted to the PPD Laboratory and identified as Q-rated Pseudococcidae (mealybugs).

A notice of rejection was issued for violation of California Food and Agricultural Code (FAC) [Section 6461.5](#) (live pests). The shipment of cut flowers was treated and released.

Mealybugs intercepted by Fresno County Dog Team on cut flowers from Hawaii, Photos courtesy of Fresno County

San Diego County Interception

PDR: 370P06227634

On November 10, 2016, San Diego County inspectors Jasmine Lopez and James Riley inspected an incoming nursery shipment of 10-inch *Phoenix roebelenii* (dwarf date palm) plants from Florida. The shipment was properly certified.

Upon inspection of the plants, inspectors Lopez and Riley found several snails in the soil of the plant pots.

Snail samples were submitted to the PPD Laboratory for identification and identified as A-rated *Allopeas clavulinum* (spike awl snail).

A notice of rejection was issued for violation of California FAC [Section 6461.5](#) (live pests). The shipment was treated and put on hold for re-inspection.

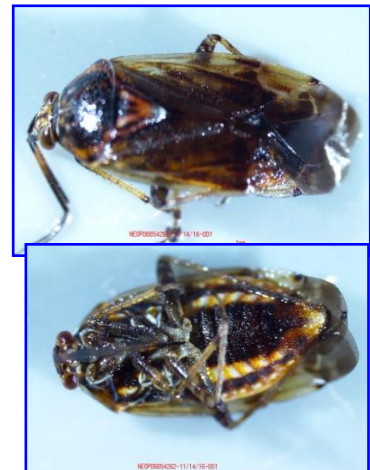

Lygus Bug Intercepted on Christmas Trees From North Carolina! PDR: NE0P06654262

On November 14, 2016, a properly certified commercial shipment of nursery Christmas trees from North Carolina entered the Needles Border Protection Station. The shipment was pulled over for processing and inspection. During inspection, Supervisor Joe Church and Inspector Michael Taylor intercepted live insects on the branches of one of the trees.

As a result of the pest find, a notice of rejection (66-071 form) was issued to the shipment, due to being in violation of California FAC [Section 6461.5](#) (live pests).

The driver opted to go back out of state and have the shipment treated in Arizona. After treatment, the shipment re-entered California at the Blythe Station. It was re-inspected with negative pest findings, and proceeded on to California destination under warning-hold notice.

Specimens collected were submitted to the PPD Laboratory and identified as Q-rated *Lygus* sp. (Lygus bug).

Pictures of Lygus bug intercepted off a commercial shipment of nursery Christmas Trees from North Carolina by Inspectors Joe Church and Mike Taylor at the Needles Station!
