

DATE: December 21, 2016
TO: All County Agricultural Commissioners
FROM: Plant Health and Pest Prevention Services
SUBJECT: **AQW Pest Report No. 47-2016**
Weekly AQW Report: For the week of November 17-23, 2016

Attached is the report for all A, Q and W pests intercepted or detected in California from November 17-23, 2016. Pests are identified by the California Department of Food and Agriculture's Plant Pest Diagnostics (PPD) Laboratory.

Q-rated Pests from Hawaii

PDRs: 190P06060327 & 0328

On November 22, 2016, Los Angeles County Inspector/Handler Diana Eckert with canine Agent and Inspector/Handler Lauren Eckert were working at a FedEx facility located in Los Angeles County and intercepted a box of Hawaiian cut flowers from the Island of Hawaii. The carton was marked as Hawaiian Tropical Flowers with USDA Limited Permit Stamp No. HILO CF 860. Upon inspection, inspector Diana Eckert found an aphid on the flowers.

The pest sample was submitted to the PPD Laboratory and confirmed to be a Q-rated Aphididae (aphid).

A notice of rejection was issued for violation of California Food and Agricultural Code (FAC) [Section 6461.5](#) (live pests). The shipment of cut flowers were destroyed by freezing.

During that very same day, another shipment from Hawaii containing pineapples from the Island of Maui was also intercepted by the aforementioned inspection team.

The carton was marked as Maui Gold Pineapples with USDA Limited Permit Stamp No. 515 Maui, HI. Upon inspection, Lauren Eckert found a mealybug within the package.

The pest sample was submitted to the PPD Laboratory and confirmed to be Q-rated *Dysmicoccus neobrevipes* (gray pineapple mealybug).

Interception of Hawaiian pineapples, photo courtesy of Los Angeles County

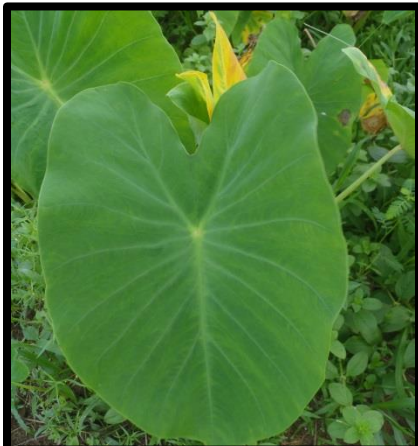

A notice of rejection was issued for violation of California FAC [Section 6461.5](#) and the pineapples were destroyed by freezing.

Hawaiian Hitchhikers

PDRs: 410P06325129 & 410P06325131

On November 18, 2016, while working at Federal Express in South San Francisco, San Mateo County Inspector Mike Garibaldi found several A- and Q-rated pests in two shipments from Kihei, Hawaii.

Inspector Garibaldi found aphids infesting approximately nine pounds of taro leaves in a shipment that was properly certified by the USDA. After submitting the pest sample to the PPD Laboratory, they were confirmed as Q-rated Aphididae (aphid).

Healthy taro leaf. Image retrieved from <http://www.oceaniatv.net/wp-content/uploads/2013/01/em-healthy-leaf.jpg>

Later that same day, in another USDA certified parcel from Kihei, Hawaii Inspector Garibaldi found five ti leaf leis to be heavily infested with scale. The PPD Laboratory confirmed the suspect pests as:

- A-rated *Pseudaulacaspis cockerelli* (magnolia white scale)
- A-rated *Pseudaonida trilobitiformis* (trilobe scale)
- Q-rated Coccidae (scale)

In both cases a notice of rejection was issued for violation of California FAC [Section 6461.5](#) (live pests) and the offending plant material was destroyed.
