

DATE: December 17, 2012

TO: All County Agricultural Commissioners

FROM: Plant Health and Pest Prevention Services

SUBJECT: **A and Q Pest Report No. 43-2012**
Weekly A and Q Report: For the week of October 18-24, 2012

Attached is the report for all A and Q pests intercepted or detected in California from October 18-24, 2012. Pests are identified by the California Department of Food and Agriculture's Plant Pest Diagnostics Laboratory.

***Singhiella simplex* (Ficus whitefly)**
As Reported from Pest Detection Advisory No. PD24-2012

PDR: 190P06058479, 480

"In early October, an employee from a pest control company notified the Los Angeles County Agriculture Department regarding large quantities of flying adult whiteflies, from ficus trees, in the City of San Gabriel. Collected samples were tentatively identified by Los Angeles County Senior Biologist, Dr. Gevork Arakelian as *Singhiella simplex* (Ficus whitefly) and confirmed by CDFA Insect Biosystematist, Dr. Gillian Watson.

This find represents a new state and county record for California and Los Angeles County.

Subsequent sampling has confirmed other infestations in San Gabriel and Rosemead, and Dr. Arakelian reports one in San Marino – all in Los Angeles County.

CDFA has classified the ficus whitefly as a Q-rated pest, while it investigates the scope of the infestation and requests that county inspectors be on the alert and submit suspect samples to the CDFA Plant Pest Diagnostics Laboratory in Sacramento.

Distribution:

Ficus whitefly (*Singhiella simplex*) is native to India, Burma, and China. It was not known to occur outside of those nations until it was found in Florida in 2007 when residents began to notice heavy infestations on Weeping Fig (*Ficus benjamina*) trees. By 2009 the whitefly had obtained a fairly widespread distribution in the southern half of the state. It has also recently been found in Brazil.

In Florida, ficus whitefly is most commonly found on Weeping Fig (*Ficus benjamina*). It also attacks Cuban Laurel (*F. microcarpa*), Strangler Fig (*F. aurea*), Banyan Tree (*F. benghalensis*), Fiddle Leaf Tree (*F. lyrata*), Banana Leaf Fig (*F. maclellandii*), False Banyan Tree or Lofty Fig (*F. altissima*), Cluster Fig or Indian Fig (*F. racemosa*), and Shortleaf Fig (*F. citrifolia*). Plants with severe infestations of Ficus whitefly exhibit yellowing of leaves, defoliation, branch dieback, and may be killed."

If you have any questions regarding pest interceptions listed under the action codes Quarantine - State Exterior (01) or Quarantine - State Interior (02), contact Terra Walber at terra.walber@cdfa.ca.gov
