

Frequently Asked Questions related to the Quota Implementation Plan Referendum for Petition #5

Voting Period: June 12, 2025 to September 10, 2025

Last updated June 6, 2025

What is being asked by the referendum? The California Department of Food and Agriculture (CDFA) is conducting a referendum among California Market Milk producers to determine if the Quota Implementation Plan (QIP) should be terminated effective immediately.

The referendum is called as a result of a recommendation made by the Producer Review Board (PRB) to the Secretary to issue an industry referendum from a certified petition submitted by StopQIP to terminate the QIP. A copy of the Findings can be viewed here:

<https://www.cdfa.ca.gov/dairy/QIP2025-referendum/>

Where can I see the petition to terminate? The full text of the petition to terminate the QIP may be viewed at the following link:

<https://www.cdfa.ca.gov/dairy/QIP2025-referendum/>

Who can vote in the referendum? Pursuant to the following definitions within the QIP, eligible producers must meet the following definitions within the voting period:

- “Producer” means any person that produces market milk in the State of California from five or more cows and includes members of cooperative associations.
- “Market milk” means milk, cream, or skim milk that is produced in conformity with applicable regulations of the appropriate public regulatory or health authority for disposition as market milk.

How long is the voting period? Statute states a minimum 60 days with an extension not to exceed 30 days. CDFA has established the voting period to include the maximum amount of time, 90 days: starting June 12, 2025 through September 10, 2025. Because the extension is built into the original voting period, there will be no additional extension available after September 10, 2025.

For the vote to be valid, 51% of producers must cast valid ballots. Will CDFA monitor if the 51% minimum participation is met during the voting period? Since the voting period will be the full 90 days allowed, CDFA will not monitor if the 51% minimum participation requirement is met during the voting period. Ballots will remain sealed and will not be tallied until after the close of the voting period.

How is the producer list derived and updated? To be eligible to vote, a producer must have a Market Milk permit. CDFA will combine multiple Market Milk dairies under same/exact ownership and count as one eligible producer. CDFA uses the following sources to update our list and are as follows:

- State inspectors that issue market milk permits
- Authorized county inspectors that issue market milk permits
- The cooperative producer belongs to
- A plant a producer ships milk to or has a contract with
- A broker a producer markets milk through
- Pool quota transfer applications
- Secretary of State

Can you provide an outline for the process of validating the ballots? CDFA is using the April 2025 Market Milk producer list to verify production numbers and to verify ballots received for tallying purposes. CDFA obtains individual producer monthly production information from cooperatives, handlers/plants, and brokers. The ballots issued include the names of the authorized Market Milk producers on record for the dairy (or dairies under same ownership) and the respective mailing address; they also include production information. Ballots received by CDFA will remain sealed and will not be opened until ten days after the close of the voting period which is September 10, 2025. This allows time for USPS to deliver those ballots mailed and postmarked September 10, 2025. A ballot will be deemed invalid, but not limited to any of the following reasons:

- Failure to sign and certify the ball
- Un-authorized signature on the ball
- No indication of a “yes” or “no” vote
- Was not received or has a postmark date that is after the September 10, 2025 voting deadline
- Producer was not a Market Milk producer at the conclusion of the referendum

There will be no curing of received ballots.

What should a producer do if names on the ballot are not correct? Each ballot will include an identification number, producer number (or numbers), names of individuals on title for the dairy or dairies and mailing address. Names on the ballot are those

individuals that are considered authorized to sign the ballot on behalf of the producer. If the individuals listed on the ballot has changed (such as additions or deletions), the producer should contact CDFA at pooling@cdfa.ca.gov and/or **916-900-5012** to make corrections and receive a revised duplicate ballot.

It is important that producers know the correct production information used to tally. Will a producer's production be included on the ballot? CDFA will include the April 2025 production volume on each ballot. Note that in the event there is more than one dairy associated with the ballot, the April 2025 production amount listed will be the combined total for all dairies under the same ownership.

What if the production information on the ballot appears incorrect? Each month CDFA collects the producer production reports from cooperatives, handlers, plants, and brokers. That information is the basis for our monthly assessments; each dairy's information is tracked using a unique identifier (producer number). If there is a question about accuracy of the production information on the ballot the producer should contact CDFA at pooling@cdfa.ca.gov and/or **916-900-5012** for a review of the information and to make any necessary changes.

Can a producer contact CDFA to determine if their ballot was received? Yes. Producers are encouraged to return the ballots in the postage paid return envelope provided with the ballot. The reverse side of the envelope includes the identification and producer numbers associated with the ballot and will allow CDFA to monitor whether a ballot was received, without opening the envelope.

What if I did not receive a ballot or the ballot is damaged or lost? A producer should contact CDFA at pooling@cdfa.ca.gov and/or **916-900-5012** to obtain a duplicate ballot. In the event CDFA receives both the original ballot and the duplicate ballot, CDFA will only use the duplicate ballot for tallying purposes.

What if the dairy had April production, but went out of business before the voting period ended? CDFA would only count the ballot if the dairy was operating during the entire voting period.

What if the dairy started operating on or after May 1, 2025? CDFA would allow the producer to vote by number only. However, the dairy's production would not be used in the production tally

What does immediate termination mean? Immediate termination means all QIP assessments and payments will apply to assessable milk (see QIP Article 1. Definition) produced until the day the referendum results are announced. Assessable milk produced starting the day after the announcement would not qualify for any QIP assessments and payments. The Quota Administration Program (QAP) would continue

to operate in an administrative capacity to wind down the Plan. If any, remaining quota fund reserves will be refunded based solely on the production of assessable milk during the full calendar month immediately preceding the termination.

Will the final referendum tally be posted online? After the referendum is finalized, votes have been tallied and audited, and results have been announced, CDFA may post on its website a list of the ballot identification numbers so producers will be able to verify that their vote was received and counted.

Where can I send my ballot? Please send your ballot in the postage paid return envelope provided with your ballot. The return envelope is pre-labeled with a return address. If you are **NOT** using the return envelope, please use the following address to ensure your ballot is received correctly:

CDFA Marketing Branch

1220 N Street, Sacramento, CA 95814

What if I have other questions? Contact CDFA at pooling@cdfa.ca.gov and/or **916-900-5012**. Please continue to check this page frequently as it will be updated as additional inquiries are received.
