Percent Share of Selected U.S. Dairy Product Production January - June 2012, by Region

¹ The West region also includes Alaska and Hawaii data.

² Central: the West North Central, East North Central and South Central Regions. Regions were combined because fewer than three plants were reporting production of some of the products.

³ Atlantic: North Atlantic and South Atlantic Regions. Regions were combined because fewer than three plants were reporting production of some of the products.

- ▶ The West Region accounts for 23.4 percent of the U.S. population and produces the largest percent share of U.S. nonfat dry milk (76.6 percent), butter (53.0 percent), and milk production (41.7 percent).
- ▶ The Atlantic and Central Regions each represent nearly the same percent shares of the U.S. population (37.1 percent and 39.5 percent respectively), however the Atlantic region's geographic area is much smaller in size and accounts for only 18.0 percent of the milk produced in the U.S.
- ▶ The West and Central Regions are very similar in percent share of total U.S. milk production, 41.7% and 40.3%, respectively, and total U.S. cheese production, 42.4% and 44.8%, respectively.
- ▶ By far, the Central Region produces the largest percent share of total U.S. Ice Cream production, 53.3%.

The Dairy Statistics Unit appreciates the cooperation of all dairy processors by filing monthly statistical reports with our office. These reports are carefully reviewed in an attempt to identify and correct any errors in reporting. All data is received directly from either California dairy processors or federal Milk Market Administrator offices in regions neighboring California. While data is submitted from reliable sources, no representation is made as to the complete accuracy of the data reported. Data is published subject to errors, revisions, or withdrawals without notice.
