

Dear Sirs,

These last 18 month for us and all CA. dairy farmers have been devastating. Many of my friends and neighbors have had to exit the business.

I too am on the verge of that decision. A decision that we do not want to make. We are a third generation CA dairy farmer.

Dairy farming is an important part of CA. we supply jobs and food. Please help us to never see this devastation again.

With a floor price we will not make profit but still stay in business during such big down turns.

We still have a responsibility to our cows and there well being. Even when the market turns. We can't just "SHUT THE PUMPS"

Please help us help ourselves.
(I support a national supply management program)

Best Always,
Barbara Martin
