

CALIFORNIA DEPARTMENT OF
FOOD & AGRICULTURE

Karen Ross, Secretary

December 26, 2012

Annual Determination Related to Quota Issuance

TO THE PRODUCER ADDRESSED:

Annually, the Department must determine if there has been an increase in the Class 1 and 2 solids-not-fat usage during the most recent September through August time period. This is required by the Milk Pooling Plan and California Food and Agricultural Code. In making this determination, the current time period is compared to the previous highest year since 1988-1989. Any increase in such usage is allocated to producers as pool quota. New quota allocations are issued in January of the following year.

A comparison of Class 1 and 2 (market milk required) daily sales for the period of September 2011 through August 2012, with comparable sales for September 1990 through August 1991 (the highest previous year) reveals that there was a decrease in Class 1 and 2 usage by 75,375 SNF daily pounds.

Based upon the decrease in daily Class 1 and 2 usage, the Department is announcing no new quota will be allocated on January 1, 2013.

Sincerely,

John Lee
Branch Chief
