## National Dairy Situation & Outlook – USDA Estimates

### Milk Production

Monthly: USDA estimates overall milk production across the U.S. was up by 2.0% in May 2012, compared to May 2011. USDA reports that California milk production increased 1.9% compared to May 2011 (on 16,000 more cows and 20 more pounds of milk per cow). Among other western states, compared to May 2011, Arizona was up 5.0%; New Mexico was up 1.4%; and Washington was up 3.0%. Only one of the top 10 states reported a production decrease. The largest increase was reported by Utah at 8.3% growth in milk production (on 4,000 more cows and 55 more pounds of milk per cow).

**Quarterly:** For the first quarter of 2012 compared to the fourth quarter of 2011, U.S. milk cow numbers increased to 9.254 million head, milk production per cow increased to 5,510 pounds; the net effect was increased milk production at 51.0 billion pounds. USDA projects that for the second quarter of 2012 compared to the first quarter of 2012, U.S. milk cow numbers will increase to 9.270 million head, production per cow will increase to 5,600 pounds; the net effect would be increased milk production to 51.9 billion pounds.

### Milk Prices

Comparing the first quarter of 2012 to the fourth quarter of 2011, U.S. average milk prices decreased to \$17.97/cwt. USDA projects that for the second quarter of 2012, U.S. average all-milk prices will be \$16.30-16.50/cwt.; Class 4b prices will be \$15.30-15.50/cwt.; and Class 4a prices will be \$13.70-14.00/cwt.

### Utility Cow Prices

Comparing the first quarter of 2012 to the fourth quarter of 2011, average U.S. utility cow prices were up \$13.03/cwt. to a national average of \$76.57/cwt. USDA projects that utility cow prices will average \$82-85/cwt. in the second quarter of 2012.

## CDFA Reinstates Assessments

The California Food and Agricultural Code (Code) authorizes the Secretary of Food and Agriculture to collect a Market Milk Administration Fee (Fee) on Grade A market milk and Grade B manufacturing milk sold into commercial trade channels in California to fund the operations of the Dairy Marketing Branch (DMB). The DMB actively monitors the cash balance to ensure a reasonable balance of a three-month reserve is maintained in order to fund branch expenditures.

At the October 2011 meeting of the Dairy Advisory Committee (DAC), the DMB provided projections of the cash balance in its Milk Stabilization Fund and reported that the Branch had a sufficient balance to suspend collecting the Milk Stabilization Fee until such time as the balance was drawn down to a three-month reserve. The DAC agreed and the Fees were suspended as of January 1, 2012.

After careful monitoring and review of the cash balance of the Milk Stabilization Fund, it is

projected that the Branch's cash balance will soon reach the recommended three-month reserve level, therefore it is recommended that collection of the Fees be reinstated for milk produced on or after July 1, 2012.

The maximum total assessment authorized by the Code is two and four-tenths cents (\$0.024) per hundredweight of market milk sold. To better coincide with the actual monthly expenditure level of the program, the branch continues to recommend that the rate of assessments for Grade A market milk be reduced to a lower rate of one and two-tenths cents (\$0.012) per hundredweight, two-thirds of which is assessed to producers of market milk and one-third to handlers of market milk. The rate of assessments for Grade B manufacturing milk will remain at previous levels of one and eight-tenths cents (\$0.018) per hundredweight, two-thirds of which is assessed to producers of manufacturing milk and one-third to handlers of manufacturing milk.

All Data displayed in the Dairy Information Bulletin is subject to change and/or revision.

The Dairy Statistics Unit appreciates the cooperation of all dairy processors by filing monthly statistical reports with our office. These reports are carefully reviewed in an attempt to identify and correct any errors in reporting. All data is received directly from either California dairy processors or federal Milk Market Administrator offices in regions neighboring California. While data is submitted from reliable sources, no representation is made as to the complete accuracy of the data reported. Data is published subject to errors, revisions, or withdrawals without notice.
