1/ This haul survey provides the geographic area where milk is produced at ranch (source) and the plant (destination) of first receipt.

2/ The approximate number of loads is calculated by taking total pounds shipped divided by 50,000 pounds.

3/ The mileage range is the lowest and highest miles traveled from ranch-to-plant (one way destination).

4/ The average miles traveled from ranch-to-plant (one way destination) is weighted on pounds shipped.

5/ Haul rate includes flat charge (rate per cwt.), fuel surcharges, and stop charges.

6/ This is the pounds of milk pooled compared to pounds captured in haul survey for the same time period.
