SUBJECT: Diesel and Biodiesel Labeling and Advertising Training

In today's retail marketplace, the sale of diesel and biodiesel fuel can be somewhat confusing because conventional diesel, renewable diesel, and biodiesel may legally be sold separately or in combination with another product. The Division of Measurement Standards (DMS) will offer two webinars to assist county weights and measures officials in identifying the correct advertising and labeling of Conventional Diesel #2, Renewable Diesel #2, Biodiesel B20, Biodiesel B20 blended with Renewable Diesel #2, and Conventional Diesel #2 blended with Renewable Diesel products. The training will also include an overview of the laws and regulations pertaining to these products and methods to determine the type of product being sold.

Prerequisites: None
