

**State of California**  
Department of Food and Agriculture  
Division of Measurement Standards

Certificate Number 5571(a)-09  
Page 1 of 3

***California Type Evaluation Program***  
***Certificate of Approval***  
***For Measuring and Weighing Devices***

**For:**

Scale System Controller  
Weigh Station Application  
Trademark: 3 Log Systems  
Model: WeighWiz  
Version: 5.00build27

**Submitted by:**

Roseburg Forest Products  
98 Mill Street  
Weed, CA 96094  
Tel: (530) 938-5733  
Fax: (530) 938-5490

Contact: Toby Mills

**Standard Features and Options**

Primary weight indications and motion detection are provided by a compatible, certified indicating element.

Operator display with live weight indication  
Receipt printing capability  
Stored or timber tare capability

Minimum system requirements:   Computer display  
                                                  Alphanumeric keyboard  
                                                  Network server (for IT support only, no remote configuration)  
                                                  Printer  
                                                  Local terminal and network configuration

                  Operating system:   Windows XP  
                  Program Language:   C#  
                  Processor:       1 GHZ, 256 MB RAM

**Note:** The user of this system is responsible for correct weighmaster certificate content and compliance with applicable weighmaster laws.

This device was evaluated under the California Type Evaluation Program (CTEP) and was found to comply with the applicable requirements of California Code of Regulations for "Weighing and Measuring Devices." Evaluation results and device characteristics necessary for inspection and use in commerce are on the following pages.

Effective Date: September 25, 2009

Edmund E. Williams, Director

**Roseburg Forest Products**  
**Weigh Station Application Software**  
**Trademark: 3 Log Systems**  
**Model: WeighWiz**  
**Version: 5.00build27**

**Application:** General purpose log-weighing system when interfaced with compatible, certified indicating and weighing elements.

**Identification:** The identification information is displayed when the **F1** key is pressed.

**Sealing:** This system does not require provisions for sealing. The system's operational configuration settings are password protected and retained by the user. The system source code that protects the metrological configuration settings is retained by the software developer. Provisions for sealing metrological parameters are provided by the certified vehicle weighing and indicating elements.

**Operation:** A loaded truck is weighed and a gross weight established with the truck's ID number. An established average or timber tare weight, specific to the truck ID number, is then recalled and subtracted from the gross weight to give a net weight. This weighing operation is a single pass system.

**Test Conditions:** This Certificate supersedes Certificate of Approval Number 5571-08 and is issued to add stored average tares or timber tares to the weighing operation. The scale system controller software, Model WeighWiz, was interfaced with a Mettler-Toledo indicator, Model JagExtreme (Certificate of Conformance Number 94-096A6) and Fairbanks Scale Manufacturing Company weighing element, Model LCF-R4010-2 (Certificate of Conformance Number 89-151A2). Several weighing operations were carried out at a field location. The emphasis of the evaluation was on device design, operation, interaction with indicating and weighing elements, customer display and correctly printed information.

Previous test conditions are listed below for reference.

**Certificate of Approval Number 5571-08:** The scale system controller software, Model WeighWiz, was interfaced with a Mettler-Toledo indicator, Model JagExtreme (Certificate of Conformance Number 94-096A6) and Fairbanks Scale Manufacturing Company weighing element, Model LCF-R4010-2 (Certificate of Conformance Number 89-151A2). Several weighing operations were carried out at a field location and several weigh tickets were printed for confirmation with weighmaster requirements. The emphasis of the evaluation was on device design, operation, interaction with vehicle indicating and weighing elements, customer display, printed information and compliance with accurate weighing requirements.

Results of the evaluation indicate the device complies with applicable requirements.

**Type Evaluation Criteria Used:** Title 4, California Code of Regulations, 2009 Edition

**Tested By:** S. Boyd (CA), 5571-08, 5571(a)-09
