

San Joaquin County is currently recruiting for:

AGRICULTURAL BIOLOGIST/ STANDARDS INSPECTOR I, II & III

The Department

The Agricultural Commissioner's Office enforces the provisions of the California Food and Agricultural Code for the protection of the public's health, safety and welfare, and promotes and protects the agricultural industry. Additionally, the Agricultural Commissioner's Office enforces pesticide use and worker safety regulations and quarantine regulations; and performs pest detection, pest management and pest eradication activities.

The Positions

Agricultural Biologist Standards Inspectors perform professional and technical work in enforcing state, federal, and local agricultural and weights and measures laws and ordinances. An employee in this class enforces various provisions of the Food and Agriculture Code, the California Business and Professions Code, and other related aspects of the California Code of Regulations. Incumbents are expected to be licensed and proficient in the full range of agricultural and weights and measures inspection and enforcement programs and may provide direction and training to less experienced employees.

The Agricultural Commissioner's Office is currently recruiting for several full-time positions, as well as multiple temporary positions that will primarily be assigned to enforcement duties related to the impending cherry harvest season.

The Series

The Agricultural Biologist/Standard Inspector I is the first level class in the Agricultural Biologist/Standards Inspector series. As knowledge and experience are gained, this entry level position can promote within the series to the II level after obtaining 5 valid licenses as a County Agricultural Inspector/Biologist and Weights and Measures Inspector and possession of two years of experience working as a state-licensed county agricultural inspector/biologist or weights and measures inspector.

Agricultural Biologist Standards Inspectors II can promote within the series to the III level after obtaining all valid licenses in eight statewide specific categories as a County Agricultural Inspector/Biologist and Weights and Measures Inspector and possession of five years of experience working as a state-licensed county agricultural inspector/biologist or weights and measures inspector. Possession of a valid license as a County Deputy Agricultural Commissioner issued by the California Department of Food and Agriculture may

Your Typical Duties

- Inspects a wide variety of items for compliance with plant quarantine regulations; learns to determine and enforce the appropriate disposition of inspected items that do not conform to regulations.
- Inspects a wide variety of agricultural produce, eggs, and other related items to insure compliance with regulations and minimum standards for quality; learns to inspect product samples, issue certificates of inspection, and restricts sale and movement of sub-standard items.
- Conducts surveys for pests not known to occur in this area and carries out eradication programs against introduced pests; learns to inspect nurseries for pest cleanliness and compliance with minimum standards; learns to inspect apiaries and abate diseased hives when necessary.
- Performs a variety of responsible technical work in inspecting and conducting tests of weighing and measuring devices and packaged commodities for compliance with State Weights and Measures laws and regulations.
- Enforces pesticide regulations to insure safety of handlers, field workers, public, crops and the environment; learns to investigate complaints of damage from pesticide use and investigate pesticide-related illnesses; collects and prepares samples for laboratory analysis; assists in providing training and educational outreach to growers on pesticide safety and regulations.
- Performs a variety of investigations of suspected illegal acts or unlawful practices concerning commercial weights and measures; contacts and questions complainants and witnesses; collects available evidence; provides information concerning cases for further legal and administrative action.
- Participates in legal actions against growers, packers, shippers, farm workers, or others who do not comply with Food and Agriculture Code and subsequent regulations; participates in informal office hearings; collects and reports evidence of violations.
