

# **Best Management Practices (BMPs) for Nitrogen and Water Use in Irrigated Agriculture: A Video**

**FREP Contract # 95-0463**

## **Project Leaders**

Larry Klaas,  
AGCOM International

Thomas Doerge,  
Formerly with University of Arizona

## **Summary**

The result of this project was a 30-minute educational video which defines and illustrates technologies and handling practices for best management of N in California agricultural systems. It discusses the role of N and its behavior in vegetable and orchard systems. Two case studies were presented and nitrate-sensitive areas in California are discussed. A study guide is included. The video is available from FREP by calling (916) 445-0444.
