

Best Management Practices (BMPs) for Nitrogen and Water Use in Irrigated Agriculture: A Video

FREP Contract # 95-0463

Project Leaders

Larry Klaas
AGCOM International

Thomas Doerge
Formerly with University of Arizona

Summary

The result of this project was a 30-minute educational video which defines and illustrates technologies and handling practices for best management of N in California agricultural systems. It discusses the role of N and its behavior in vegetable and orchard systems. Two case studies were presented and nitrate-sensitive areas in California are discussed. A study guide is included. The video is available from FREP by calling (916) 445-0444.
