

2020 Sample Report

The Commercial Feed Regulatory Program (CFRP) has finalized its sampling data from 2020. Despite changes to everyday operations as a result of the pandemic, CFRP inspectors still managed to collect a total of 704 samples while following the program's enhanced COVID-19 protocol. In addition, 2020 saw the CFRP transition analytical services to the University of California, Davis, Analytical Laboratory (An Lab) and California Animal Health and Food Safety Services (CAHFS) Laboratory. Both An Lab and CAHFS worked quickly to accommodate CFRP, allowing for a virtually seamless transition in analytical services with no disruption to industry. A huge thank you to the inspectors and laboratory staff who work to ensure a safe and wholesome supply of feed for California's livestock. Data on the 2020 samples is provided below.

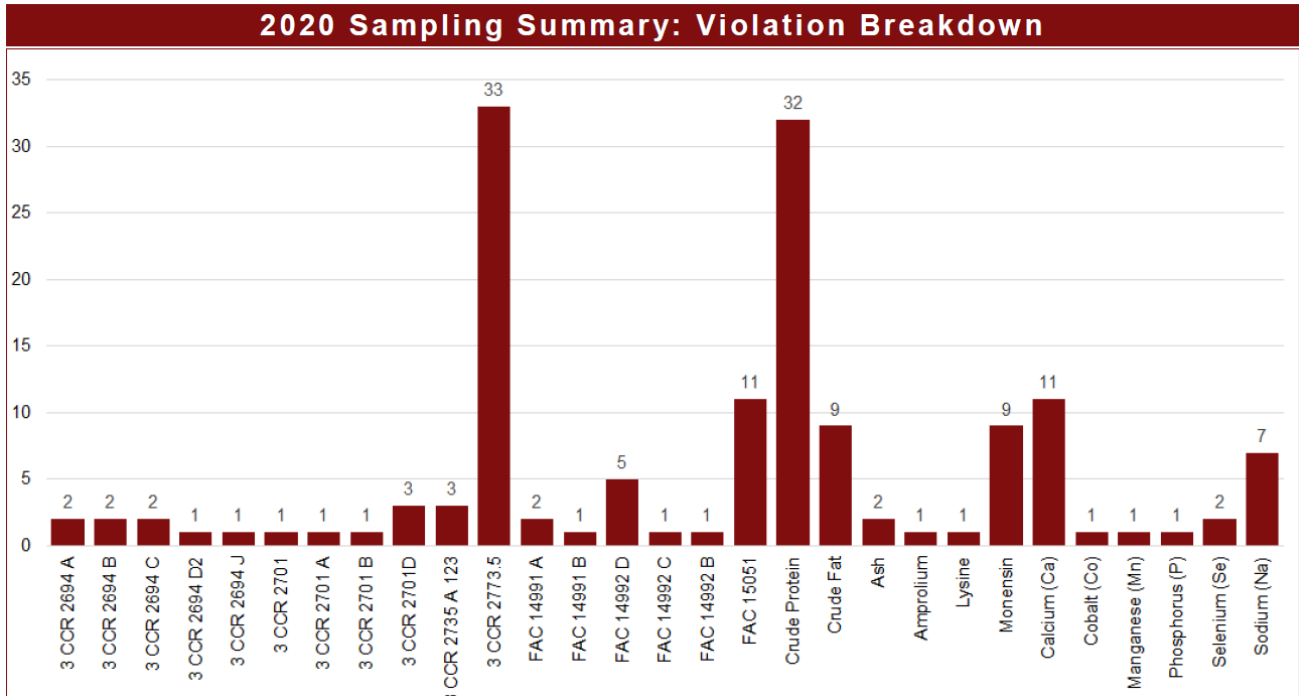

2020 Sample Types	Number	Percentage
Food Safety	372	53%
Label Compliance	332	47%
Total	704	100%
Violative Samples	147	21%

2020 Safe Animal Feed Education (SAFE) Program Samples
1 Mixer Study
1 Flush Verification

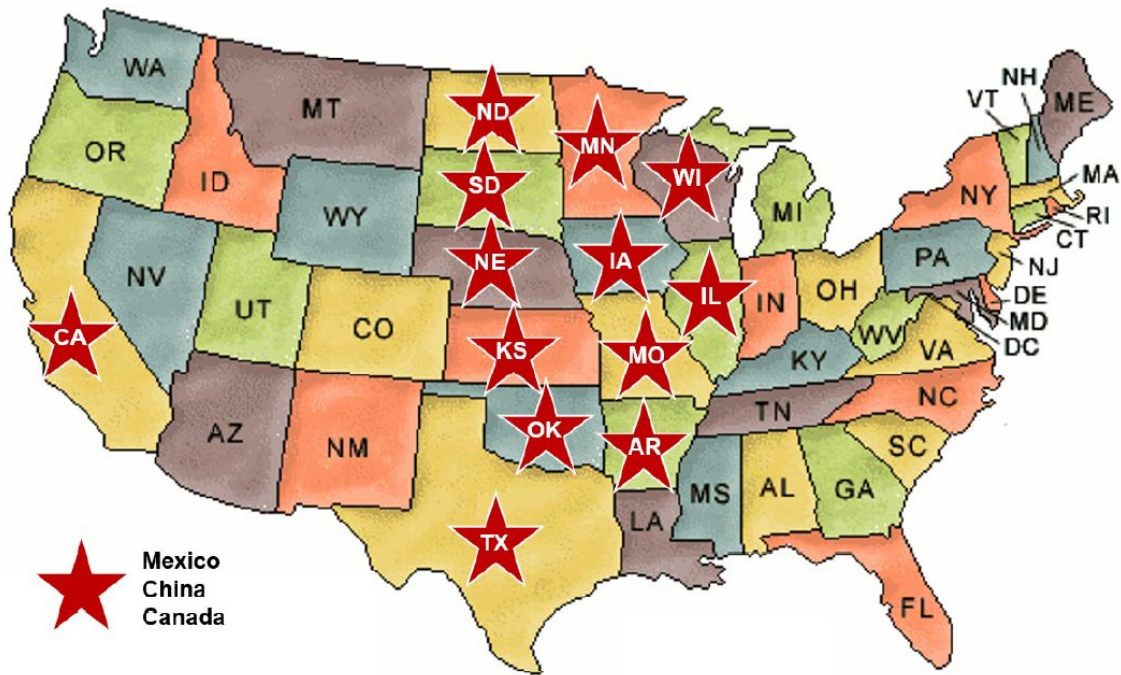

2020 Sample Report

Note: "3 CCR" refers to California Code of Regulations Title 3;
 "FAC" refers to Food and Agricultural Code.

CFRP obtained samples of feed products and ingredients from the following locations coming into California in 2020: Mexico, China, Canada, California, Texas, North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, Illinois, Missouri, Wisconsin and Arkansas
