

CALIFORNIA DEPARTMENT OF  
FOOD & AGRICULTURE

Karen Ross, Secretary

January 8, 2015

Last week's freezing temperatures warranted executing procedures from the Citrus Freeze Protocol to evaluate if damage occurred to citrus. Information submitted by the citrus producing counties revealed that there was no significant damage. No further action from county personnel is necessary at this time and the teleconference call scheduled for Friday, January 9, 2015 has been canceled.

I would like to thank county personnel for their assistance and cooperation this past week. Your hard work is appreciated by the Department and the industries that we serve.

Sincerely,

***Karrie Batchelor***

Inspection and Compliance Branch  
Standardization Program Supervisor
