2020 Alternative Manure Management Program Demonstration Project – Advancing Practices Farmer-to-Farmer

Applications submitted to CDFA

#	Organization Name	Project Title	Project Description*	County	Requested Funds Amount	Matching Funds Amount	Was the project funded?
1	University of California Davis	Advancing Manure Management Practices Farmer to-Farmer Project	The project is proposing to conduct demonstration at two California dairy farms. These selected dairy farms have two unique manure management practices which were original funded by CDFA under the AMMP program in 2017. The proposed activities involve field visits, data collection and analysis, outreach, field day activities, resource and knowledge dissemination, and onboarding. In addition to disseminating CDFA's AMMP planning objectives, the proposed project activities will also generate science-based knowledge for continuation and improvement of projects related with animal waste management in California.	Yolo	\$149,996	\$239,000	No
