

2020 Climate Change Consortium for Specialty Crops: Southern California Regional Report

Questions for Public Comment:

- What climate-related changes do you experience/observe on your land now? (Appendix 1, Q.1)
- Given the projected impacts, what do you see as the greatest challenges and/or opportunities for Southern Californian agricultural producers and lands in the short term or long term? (Appendix 1, Q.3)
- What practices or actions are producers in S. Cal. taking to address these climate-related challenges? (Appendix 1, Q.4)
- Are there additional practices and/or actions that you think producers could take in the future to address these challenges and increase their farm's long-term climate resilience? (Appendix 1, Q.6)
- What knowledge do you think is needed to help producers implement these practices or actions? (Appendix 1, Q.7)
- What other kinds of support do you think are needed to help producers implement these practices or actions? (Appendix 1, Q.8)
- How can outreach be more effective to underserved groups, aside from increasing staff availability of Technical Assistance Providers in the UC Cooperative Extension and California RCD systems (as the CDFA is doing)?
