The 2021 Healthy Soils Program Incentives Program is funded by the California State Budget General Fund and the California Climate Investments.

Request for Grant Applications

Release date: November 1, 2021
Rolling application submission up to 5:00 p.m. PT on February 25, 2022 or until available funds are expended.

Late Submissions will not be accepted.

Office of Environmental Farming and Innovation
California Department of Food and Agriculture
1220 N Street, Sacramento, CA 95814
BACKGROUND AND PURPOSE
The California Department of Agriculture (CDFA) is pleased to announce funding availability through a competitive grant process for the 2021 Healthy Soils Program (HSP) Incentives Program.

The 2021 HSP Incentives Program is part of the Healthy Soils Program (HSP), which stems from the California Healthy Soils Initiative, a collaboration of state agencies and departments that promotes the development of healthy soils on California’s farmlands and ranchlands. The 2021 HSP Incentives Program is funded by California State Budget, authorized by the Budget Act of 2021 (SB 129, Chapter 69) and the California Climate Investments.

The objectives of the HSP are to increase statewide implementation of conservation management practices that improve soil health, sequester carbon and reduce atmospheric greenhouse gases (GHGs) by (1) providing financial incentives to California growers and ranchers for agricultural management practices that sequester carbon, reduce atmospheric GHGs and improve soil health, (2) funding on-farm demonstration projects that conduct research and/or showcase conservation management practices that mitigate GHG emissions and improve soil health, and (3) creating a platform promoting widespread adoption of conservation management practices throughout the state.

The HSP Incentives Program addresses Objective 1. Objectives 2 and 3 are addressed in the 2021 HSP Demonstration Projects. Request for Applications for both the HSP Incentives Program and the HSP Demonstration Projects are available on the HSP website: https://www.cdfa.ca.gov/oefi/healthysoils/.

FUNDING AND DURATION
CDFA was appropriated $50 million from the California State Budget and $25 million from the California Climate Investments authorized by the Budget Act of 2021 to fund HSP – Incentives Program and Demonstration Projects. The HSP Incentives Program will provide financial incentives to California growers and ranchers for implementation of agricultural management practices that sequester carbon, reduce atmospheric GHGs, and improve soil health.

- The maximum grant award is $100,000.
- The application submission period will be on a rolling basis, starting
November 1, 2021 and continuing until February 25, 2021 or until available funds are expended, whichever is earlier.

- Grant funds cannot be expended before the grant agreement is executed or after the grant agreement term has ended.
- Cost sharing (matching funds or in-kind contributions) during grant duration is not required but encouraged (See: Project Duration and Cost Sharing).
- CDFA reserves the right to offer an award different than the amount requested.

The HSP Incentives Program funds may be combined with other funds as match for the same project, such as funds from the United States Department of Agriculture (USDA) Natural Resource Conservation Service (NRCS) Environmental Quality Incentive Program (EQIP). However, HSP funds cannot cover activities or costs funded by other federal or state grant programs.

ELIGIBILITY AND EXCLUSIONS

ELIGIBILITY

- California farmers, ranchers and Federal and California Recognized Native American Indian Tribes are eligible to apply.
- Projects must be located on a California agricultural operation. For the purpose of this program, an agricultural operation is defined as row, vineyard, field and tree crops, commercial nurseries, nursery stock production, and livestock and livestock product operations.
- University and research farms, and city community gardens are not eligible for funding through the HSP Incentives Program. These entities may apply for the HSP Demonstration Projects.
- Awards are limited to one per agricultural operation using a unique tax identification number per round of funding. Individuals or business entities receiving grant award funds must be located in California with a physical California business address.
- All projects must implement at least one of the eligible agricultural management practices listed under Eligible Agricultural Management Practices, on fields where said practice was not implemented previously:
  - A previously implemented practice cannot be implemented on same field. A previously implemented practice is eligible for funding only if it is implemented on a new, different field within the same...
APN or a new APN.
  o Practices must be implemented on the same field(s) within the APN and cannot be moved to different field(s) within an APN during the term of the grant agreement.
  o Practices must be implemented on the same total acreage throughout the term of the grant agreement as proposed in the application and memorialized in the grant agreement. Decrease in acreage of practice implementation and quantified GHG reductions in the project after signature by Recipient and execution of grant agreement may result in elimination of that practice from the project and subsequent reduction of project budget. Additionally, project may be considered incomplete, and ten percent of total project budget may be withheld (see Project Verification).

- Projects must result in net GHG benefits (i.e., net positive GHG reductions) from specific eligible agricultural management practices identified in this solicitation for the grant agreement term supported by document(s) of Carbon Sequestration and GHG Estimation Report(s) (See GHG Reduction Estimation).
- Applicants must provide past three years’ baseline data on cropping and management histories directly related to fields identified by APNs where eligible agricultural management practices are proposed for implementation to be eligible for funding.
- Applicants must lease, own, or otherwise control the fields and APNs where project activities are proposed to occur for the entirety of the project duration. If leasing land, applicants must ensure the proposed project does not violate their lease agreement and document approval by the landowner to implement proposed practices(s) from date of grant agreement execution to TBD.
- If selected for funding, applicants must be able to execute a grant agreement within 30 days of receiving a notice of award.

EXCLUSIONS
- HSP Incentives Program funds cannot be used to implement management practices that are not listed under Eligible Agricultural Management Practices in this grant solicitation. All requirements for practice implementation must be followed.
- HSP Incentives Program funds cannot be used to fund fields with existing
and ongoing implementation of any agricultural management practices listed under Eligible Agricultural Management Practices.

- Fields that have previously received HSP Incentives or Demonstration awards for a particular practice are not eligible to receive additional funding for the same practice. New fields within a previously funded APN, or new practices to be implemented on previously funded fields are eligible.
- Compost Application Practices and Whole Orchard Recycling may not be implemented on APNs where soil organic matter content is greater than 20 percent by dry weight in top 20 cm (or 8 inch) depth.
- Practices may not be implemented on lands or crop types that are not suitable based on NRCS Conservation Practice Standards and NRCS California Practice Scenarios.
- HSP Incentives program funds cannot be used for projects that use potted plants and plant growth media other than soil.

ELIGIBLE AGRICULTURAL MANAGEMENT PRACTICES

CDFA has identified eligible agricultural management practices that sequester carbon, reduce atmospheric GHGs and improve soil health for 2021 HSP projects. An applicant must include the APN(s) of the field(s) where the eligible management practice(s) will be implemented. An applicant may include multiple practices on the same APN or the same practice on multiple APNs. Some practices may not be implemented on the exact same field as part of the same project. Refer to Non-Overlapping Practices for details.

The following management practices were selected from the United States Department of Agriculture (USDA) Natural Resources Conservation Service (NRCS) Conservation Practice Standards (CPS) and CDFA specified Compost Application and Whole Orchard Recycling Practices. HSP-specific GHG Quantification Methodology is currently available for these practices.

All practices must be implemented in accordance with their respective NRCS CPS requirements for implementation in California. CDFA Compost Application White Paper and CDFA’s Whole Orchard Recycling Report. HSP-specific requirements for implementation of eligible practices are based on NRCS CPS documentation and 2021 NRCS California Practice Scenarios (HSP-specific practices only). Refer to the Program Requirements and Appendix A for details.
All eligible practices are divided into the categories below:

I. Cropland
1. Alley Cropping ([USDA NRCS CPS 311])
2. Compost Application (Interim CPS 808)
   a. Compost Purchased from a Certified Facility
   b. On-farm Produced Compost
3. Conservation Cover ([USDA NRCS CPS 327])
4. Conservation Crop Rotation ([USDA NRCS CPS 328])
5. Contour Buffer Strips ([USDA NRCS CPS 332])
6. Cover Crop ([USDA NRCS CPS 340])
7. Field Border ([USDA NRCS CPS 386])
8. Filter Strip ([USDA NRCS CPS 393])
9. Forage and Biomass Planting ([USDA NRCS 512])
10. Grassed Waterway ([USDA NRCS CPS 412])
11. Hedgerow Planting ([USDA NRCS CPS 422])
12. Herbaceous Wind Barrier ([USDA NRCS CPS 603])
13. Mulching
   a. Natural Materials ([USDA NRCS CPS 484])
   b. Wood Chips ([USDA NRCS CPS 484])
14. Multi-story Cropping ([USDA NRCS CPS 379])
15. Nutrient Management ([USDA NRCS CPS 590]) (15% reduction in fertilizer application only)
16. Residue and Tillage Management – No-Till ([USDA NRCS CPS 329])
17. Residue and Tillage Management – Reduced Till ([USDA NRCS CPS 345])
18. Riparian Forest Buffer ([USDA NRCS CPS 391])
19. Riparian Herbaceous Cover ([USDA NRCS CPS 390])
20. Strip Cropping ([USDA NRCS CPS 585])
21. Tree/Shrub Establishment ([USDA NRCS CPS 612])
22. Vegetative Barriers (601) ([USDA NRCS CPS 601])
23. Windbreak/Shelterbelt Establishment ([USDA NRCS CPS 380])

II. Orchard or Vineyard
1. Compost Application (Interim CPS 808)
   a. Compost Purchased from a Certified Facility
   b. On-farm Produced Compost
2. Conservation Cover (USDA NRCS CPS 327)
3. Cover Crop (USDA NRCS CPS 340)
4. Filter Strip (USDA NRCS CPS 393)
5. Hedgerow Planting (USDA NRCS CPS 422)
6. Mulching
   a. Nature Materials (USDA NRCS CPS 484)
   b. Wood Chips (USDA NRCS CPS 484)
7. Nutrient Management (USDA NRCS CPS 590) (15% reduction in fertilizer application only)
8. Residue and Tillage Management – No-Till (USDA NRCS CPS 329)
9. Residue and Tillage Management – Reduced Till (USDA NRCS CPS 345)
10. Whole Orchard Recycling (Interim CPS 808)
11. Windbreak/Shelterbelt Establishment (USDA NRCS CPS 380)

III. Grazing Land
1. Compost Application (Interim CPS 808)
   a. Compost Purchased from a Certified Facility
   b. On-farm Produced Compost
2. Hedgerow Planting (USDA NRCS CPS 422)
3. Prescribed Grazing (USDA NRCS CPS 528)
4. Range Planting (USDA NRCS CPS 550)
5. Riparian Forest Buffer (USDA NRCS CPS 391)
6. Silvopasture (USDA NRCS CPS 381)
7. Tree/Shrub Establishment (USDA NRCS CPS 612)
8. Windbreak/Shelterbelt Establishment (USDA NRCS CPS 380)

TECHNICAL SPECIFICATIONS FOR ESTIMATION OF GHG BENEFITS

Expected Life of Practices:
To estimate the net GHG benefits due to a practice implementation, the expected life of the practice is as follows:

<table>
<thead>
<tr>
<th>Eligible Agricultural Management Practice</th>
<th>Expected Life of Practice*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Practices that involve planting of woody cover (trees and shrubs)</td>
<td>10 Years</td>
</tr>
<tr>
<td>All other practices</td>
<td>3 Years</td>
</tr>
</tbody>
</table>

*Expected Life of Practice for the HSP is different from that required by USDA-NRCS, and
distinct from the grant duration.

In addition to the NRCS CPS requirements, 2021 NRCS California Practice Scenarios and the table provided above, the following scientific documents were used to establish requirements for implementation of practices:

3. COMET-Planner Report: This report explains the scientific approaches that the quantification methodology has been utilized to estimate greenhouse gas reduction benefits for the CDFA HSP and is available at: http://bfuels.nrel.colostate.edu/health/COMET-Planner_Report_Final.pdf

Technical information from these documents was evaluated and synthesized to develop Program Requirements and Appendix A.

PROGRAM REQUIREMENTS
Submitted applications must meet all applicable requirements in this section to be considered for funding.

- Eligible agricultural management practices can be implemented alone or in combinations, except where specified, on one APN or several APNs. Specific fields within each APN where agricultural management practice(s) will be implemented should be named by Field (Such as Field 1, Field 2, Field 3, etc.).
  - Each field must be outlined clearly on the APN map.
  - All fields must have the selected agricultural management practices implemented each year for the duration of the project term.
  - Implementations must begin prior to the end (i.e., December 31) of
each project year.
  o Multiple management practices may be included within the same APN (except for Non-Overlapping Practices), and multiple APNs within the same agricultural operation may be included in the project.
  o Once awarded, recipients may not change the APNs included in the grant application through the duration of the project.
  o Implementation of eligible management practices will be incentivized based on payment rates provided in Appendix A.

- Projects proposing to implement Prescribed Grazing must be located on grazing lands (i.e. rangelands, grazed grasslands, and pastures). Applications for prescribed grazing projects must include a Grazing Management Plan prepared by a professional Certified Rangeland Manager.

- Fields where implementation of Riparian Forest Buffer and/or Riparian Herbaceous Cover practices is proposed must be adjacent to and upgradient from water courses or water bodies. Please refer to the USDA NRCS CPS 390 and 391 for more information.

- Projects proposing to implement Conservation Crop Rotation must provide a detailed plan for crop rotation, listing all cash crops and/or cover crops to be planted in the correct sequence as part of the Work Plan.

- Projects proposing to implement Cover Crops may not claim post-termination cover crop residue as mulching practice with natural materials to prevent overestimation of GHG reductions achieved.

- Projects proposing to implement practices that involve establishment of permanent woody cover must take into consideration wildlife and pollinator needs when selecting or siting tree or shrub species. Increasing species diversity, including use of native species, and avoiding species with invasive potential should be considered. Crop trees may not be planted exclusively.

- Implementation of Compost Application practices must meet the
requirements below.

- Compost Application Rates eligible for funding are provided in the table below.

<table>
<thead>
<tr>
<th>Agricultural System</th>
<th>Compost Type</th>
<th>Tons/Acre*</th>

*Compost application rates eligible for funding through this program were developed under the guidance of the Environmental Farming Act – Science Advisory Panel (EFA-SAP) and are published in a white paper report titled “Compost Application Rates for California Croplands and Rangelands for a CDFA Healthy Soils Incentives Program” (abbreviated as Compost Application White Paper) by CDFA.

- Sources of compost eligible for funding must meet the following requirements.

  - If compost is purchased:
    - Compost must be produced by a facility permitted or otherwise authorized by state and local authorities that can demonstrate compliance with all state regulations. STA (US Composting Council’s Seal of Testing Assurance Program) or CDFA-OIM (Organic Input Material) Program certified compost is recommended. Applicants may look up certified composting facilities at the CalRecycle SWIS/Site Search website:
      https://www2.calrecycle.ca.gov/SolidWaste/Site/Search
    - A report of laboratory analysis on compost C:N ratio is required.
  
  - If compost is produced on-farm:
    - Plant and animal materials must be composted through the processes outlined below and a farm log must be maintained to document the process.
      - **In-vessel or Static Aerated Pile System**: Maintain a temperature between 131°F and 170°F for 3 consecutive days.
      - **Windrow Composting**: Maintain a temperature between 131°F and 170°F for 15 consecutive days. The materials
must be turned a minimum of five times.
b. C:N ratio of the compost to be applied must be verified through laboratory testing before application. Type of material(s) used for composting must be documented.
c. Compost used in this practice must be produced at the agricultural operation where the project is located. Externally sourced compost must be purchased from a certified facility.
d. Compost used in this practice cannot be vermicompost.

- Implementation of the Whole Orchard Recycling (WOR) practice must meet the following requirements below:
  - Only orchards with trees at least ten years of age are eligible.
  - Following woodchip incorporation, land must be fallowed or replanted with trees within 3 years.
  - Orchards should be chipped and incorporated in place on the field in which they were grown, without exporting chips off-site or to new fields.
  - The WOR practice must not be implemented in soils with Soil Organic Matter greater than 20%.
  - Chips must be evenly distributed throughout the orchard. If a service provider is contracted, their commitment to spread the wood chips must be in the contract/invoice for verification purposes.
  - Chips must be incorporated into the soil to at least 6 inches depth.

- CDFA will consider the acreage of orchard and vineyard alleys as the effective practice implementation acreage for cover crop, conservation cover, reduced-till and no-till practices. For the purposes of the HSP, effective practice implementation acreage is considered 70% of the whole field acreage for orchard alleys, and 60% for vineyard alleys, respectively.

- Non-Overlapping Practices: For the purposes of the HSP, practices in the same group cannot be implemented on the exact same land area or field, i.e., cannot overlap or be on top of each other, as noted below. If proposed together, only one practice may be funded. CDFA HSP Re-Plan Tool is designed to facilitate applicants avoid selection of non-overlapping practices.
Group I:
- Cover Crop ([USDA NRCS CPS 340](https://example.com))
- Conservation Cover ([USDA NRCS CPS 327](https://example.com))
- Conservation Crop Rotation ([USDA NRCS CPS 328](https://example.com))
- Strip Cropping ([USDA NRCS CPS 585](https://example.com))

Group II:
- Residue and Tillage Management – No-Till ([USDA NRCS CPS 329](https://example.com))
- Residue and Tillage Management – Reduced Till ([USDA NRCS CPS 345](https://example.com))

Group III: Compost Application (Interim CPS 808): Compost must either be
- Purchased from a Certified Facility, or,
- On-farm Produced Compost

Group IV:
- Mulching ([USDA NRCS CPS 484](https://example.com))
- Whole Orchard Recycling (Interim CPS 808)

Group V:
- Conservation Cover ([USDA NRCS CPS 327](https://example.com))
- Contour Buffer Strips ([USDA NRCS CPS 332](https://example.com))
- Field Border ([USDA NRCS CPS 386](https://example.com))
- Filter Strip ([USDA NRCS CPS 393](https://example.com))
- Forage and Biomass Planting ([USDA NRCS CPS 512](https://example.com))
- Grassed Waterway ([USDA NRCS CPS 412](https://example.com))
- Herbaceous Wind Barrier ([USDA NRCS CPS 603](https://example.com))
- Range Planting ([USDA NRCS CPS 550](https://example.com))
- Riparian Herbaceous Cover ([USDA NRCS CPS 390](https://example.com))
- Vegetative Barriers (601) ([USDA NRCS CPS 601](https://example.com))

Group VI:
- Alley Cropping ([USDA NRCS CPS 311](https://example.com))
- Hedgerow Planting ([USDA NRCS CPS 422](https://example.com))
- Multi-story Cropping ([USDA NRCS CPS 379](https://example.com))
- Riparian Forest Buffer ([USDA NRCS CPS 391](https://example.com))
- Tree/Shrub Establishment ([USDA NRCS CPS 612](https://example.com))
- Windbreak/Shelterbelt Establishment ([USDA NRCS CPS 380](https://example.com))
- Silvopasture ([USDA NRCS CPS 381](https://example.com))

Group VII:
- Any practice listed in Group V and mulching
- Any practice listed in Group V and Group VI with reduced-till or no-till.
Note: There may be practices (individual or combination) in addition to those listed above that may not overlap for a specific project. These may be evaluated by CDFA on a case-by-case basis and addressed during pre-project consultation.

- Requirements noted in Appendix A must be followed for all HSP practices.

- Applicants must use the CDFA HSP Re-Plan Tool to develop their project design, determine if they may be located in AB 1550 Priority Populations, eligibility for Compost Application and Whole Orchard Recycling, and assistance in selecting species to be planted for specific practices based on the USDA NRCS California eVegGuide.

- CDFA strongly encourages applicants to enhance on-farm biodiversity through utilizing plant species (in applicable management practices) that support pollinator habitat and help meet the goals identified in the California Biodiversity Action Plan.

- Application ID: The CDFA HSP Incentives Program electronic application platform will generate a unique ID for each application.

- An agricultural operation can only submit one grant application using a unique tax identification number. If an agricultural operation does not have a unique tax identification number, that operation should provide the last four digits of their social security number (e.g., XXX-XX-1234) in their grant application. An agricultural operation must use the operation’s legal business name and associated tax identification number in their application. The business name provided in the application is the entity to which CDFA will extend a Grant Agreement if the project is selected for an award. (See: Award Process).

- Project Duration and Cost Sharing: The HSP Incentives Program will provide funds for the grant duration. Though not required, applicants are encouraged to provide cost share to the project through the grant duration. Cost sharing can be in the form of matching funds or in-kind contributions. Matching funds refers to a dollar amount committed to a
project from a source other than the HSP Incentives Program. An in-kind contribution is the estimated dollar value of any time, property, or supplies donated to a project, including costs associated with labor for work involved in the implementation of the proposed project. Applicants are required to certify that cost-share, if provided, has been secured at the time of application submission.

Timeline for implementation of awarded projects is provided below:

<table>
<thead>
<tr>
<th>Project Year</th>
<th>Duration of Project Year</th>
<th>Implementation Must Begin No Later Than</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Date of grant agreement execution – June 30, 2023</td>
<td>December 31, 2022</td>
</tr>
<tr>
<td>2</td>
<td>July 1, 2023 – June 30, 2024</td>
<td>December 31, 2023</td>
</tr>
<tr>
<td>3</td>
<td>July 1, 2024 – March 31, 2025</td>
<td>December 31, 2024</td>
</tr>
</tbody>
</table>

- **Baseline Data:** Applicants must submit the following baseline data at the time of application.
  - Cropping history in the past three years (2019 – 2021) in all APN(s) included in the application.
  - Management practice history in the past three years (2019 – 2021) in all APN(s) included in the application.
  - Provide the proposed plan of crops for all APNs/Fields included in the project during the next three years (2022 through 2025).

Applicants proposing to include Compost Application and/or Whole Orchard Recycling practices in their projects must use the [CDFA HSP Re-Plan Tool](#) to check if the project site is eligible for the practice. Compost Application and Whole Orchard Recycling are not allowed on a field that has soil organic matter content greater than 20 percent by dry weight for a 20 cm (or 8 inch) depth.

- **GHG Reduction Estimation:** An estimation of the reduction in GHG emissions from the selected Eligible Agricultural Management Practices and associated payments must be calculated using the Quantification Methodology (QM) and calculator tools developed by the California Air Resources Board (CARB). The QM and calculator tool are adapted from
the USDA-NRCS COMET-Planner methodology. The calculator tool used for HSP is available at http://comet-planner-cdfahsp.com/

COMET-Planner Report will be generated upon completion of the calculation, which must be included as part of the application, and is required for all eligible agricultural management practice(s) selected. Projects eligible for HSP funding must achieve net GHG reductions, i.e., GHG reductions estimated using the QM and calculator tool must be positive in consideration of all the practices selected.

TIMELINE
The application period begins on November 1, 2021. The deadline to submit a grant application is February 25, 2022 by 5:00 p.m. PT. Applications will be accepted on a rolling-basis and reviewed first-come-first serve. No exceptions will be granted for late submissions.

WORKSHOPS AND TECHNICAL ASSISTANCE
CDFA will conduct three workshops on the 2021 HSP grant application process and program requirements. All workshops will be remotely accessible through live webinar.
CDFA cannot assist in the preparation of grant applications; however, general questions may be submitted to cdfa.HSP_Tech@cdfa.ca.gov. CDFA will conduct two rounds of Questions and Answers (Q&A) to address general questions about the application submission process and program requirements. Responses to all questions received during the workshops and webinars or by email will be posted to CDFA’s HSP Incentives Program website according to the schedule below.

<table>

To maintain the integrity of the grant process, CDFA is unable to advise and/or provide applicants with any information regarding specific grant applications during the solicitation process.

In addition, CDFA-funded Technical Assistance (one-to-one on-demand assistance) across the state will be provided free of cost to all potential applicants. These technical assistance providers (TAPs) consist of experts in agricultural management practices from California academic Research Institutions, Resource Conservation Districts, and non-profit organizations. TAPs should not charge any additional fees or subsequent commitments (financial or otherwise) to help submit applications. Assistance may include technical aspects of the application process such as GHG calculation requirements, practice selection, project design, availability of a computer and internet to prepare the application. CDFA strongly encourages applicants to obtain technical assistance when developing a grant application.

Information about CDFA-conducted workshops and CDFA-funded Technical Assistance is available at https://www.cdfa.ca.gov/oefi/healthysoils/IncentivesProgram.html and https://www.cdfa.ca.gov/oefi/technical/.

**GRANT APPLICATION PROCESS**

**HOW TO APPLY**

The 2021 HSP Incentives Program is a web-based application process,
accessible at https://webportalapp.com/sp/2021_cdfa_hsp_incentives. The grant application is a series of questions in one or more of the following formats: a drop-down menu; a check box; a text box with predetermined character limitations; or as a document attachment. Responses to all questions must be submitted in the manner and format required by the application questionnaire electronically without exception. Preview of application questions is available in the Preview of Application Questions.

Applicants are encouraged to gather all required information using information provided under Required Application Documents to facilitate effective and timely submission of the grant application.

APPLICATION PERIOD
The 2021 HSP Incentives Program will accept and award applications on a rolling basis starting November 1, 2021 and continue until 5:00 p.m. PT on February 25, 2022, or until available funds are expended, whichever is earlier. Upon submission during this time-frame, a submitted application will be evaluated and decision to award the project will be made according to the Review and Evaluation process. Evaluation process for an application will be conducted in the order it was received during the application period.

APPLICATION SECTIONS
The 2021 HSP Application consists of the following sections available within the web-based application:

**Applicant Information:** This section includes names and contact information of the applicant organization, applicant, primary contact person(s) and collaborators for the project.

**Project Overview:** This section includes an overview of project, i.e., a brief description and total project cost.

**Project Logistics:** This section includes details of the proposed project, such as APNs on which practices will be implemented, number of proposed practices, associated acreage, and project baseline data.

**Project Design:** This section includes a schematic of the project design with a
map that includes APNs on which project will be implemented, with a detailed layout of practices to be implemented, total acreage of each practice and plant species to be planted on each field (if applicable). The project design must be created using the CDFA HSP Re-Plan Tool.

**Project Work Plan:** This section must be completed within the template provided by CDFA. Follow instructions provided in the web-based application and template.

**Project Budget and GHG Emission Reduction Estimation:** Estimate cost of practice implementation and GHG emission reduction must be estimated using the CDFA HSP COMET-Planner tool. Follow instructions provided in the CARB Greenhouse Gas Quantification Methodology for CDFA Healthy Soils Program and the web-based application.

**Conservation Plan:** Providing a Conservation Plan is optional, however, applications that include a qualified conservation plan with the application will receive additional points during review (See: Evaluation Criteria). A conservation plan is a plan of broad environmental/ecological impacts and solutions for the whole farm and is prepared by an NRCS specialist, an NRCS-trained individual or entity, a certified Crop Advisor, a certified Professional Soil Scientist, or a certified Professional Agronomist. A Conservation Plan should include, at a minimum:

- An aerial photo or diagram of project fields.
- A list of current management decisions.
- The location of and schedule for applying new conservation practices.
- Resource Assessment: inventory of resources and resource concerns, soils information, topographic maps, plan maps showing location of property, existing practices, structures, planned practices, soils, water features and other environmentally sensitive areas, and environmental assessment.
- Information explaining how to carry out specific management decisions.
- A plan for operation and maintenance of the management practice(s).

**Additional Priority:** This section consists of one optional question where applicants may indicate if they belong to Socially Disadvantaged Groups. Not answering this question will not negatively impact the application; however, providing a response will assist CDFA in prioritizing funding to Socially Disadvantaged Farmers and Ranchers. See Funding Priority.
REVIEW AND EVALUATION PROCESS

REVIEW PROCESS

CDFA will conduct multiple levels of review during the grant application process. The first level review is an administrative review to determine whether application is complete, program requirements were met and if applicable, assess an applicant’s past grant performance. All required documentation must be submitted to avoid disqualification. Projects that do not pass the first level review will not be moved to the second level review.

The second level review is a technical review to evaluate the feasibility and overall likelihood of project success, including selection of HSP practices associated with suitable crop/land type, a clear and proper project design, a reasonable implementation timeline (work plan), and the correct estimation of GHG emission reductions and carbon sequestration. The technical review committee comprises of academic researchers, extension specialists and farm advisors affiliated with the University of California and California State University systems.

EVALUATION CRITERIA

Applications will be evaluated based on the following criteria (see Detailed Scoring Criteria for additional information). An application must score a minimum of 40 points to be considered for funding.

<table>

FUNDING PRIORITY
Socially Disadvantaged Farmers and Ranchers
Twenty-five percent (25%) of the funds available for HSP Incentives Program will be awarded to projects that benefit Socially Disadvantaged Farmers or Ranchers. CDFA will ensure the inclusion of Socially Disadvantaged Farmers and Ranchers in all programs, including HSP, consistent with the Farmer Equity Act of 2017.

Benefits to Priority Populations
SB 535 established statutory requirements that a minimum of 25 percent of California Climate Investments is allocated to projects that provide benefits to disadvantaged communities, and of that 25 percent, a minimum of 10 percentage points is allocated to projects that are also located within disadvantaged communities. AB 1550 (Gomez, Chapter 369, Statutes of 2016), amended these requirements by increasing the percent of funds for projects located in disadvantaged communities from 10 to 25 percent and added a focus on investments in low-income communities and households. Collectively, these communities are referred to as ‘priority populations’. AB 1550 investment minimums apply to the overall appropriations of monies from the GGRF.

In 2021, CARB has established an overall target of 35% of funds appropriated to the HSP from the California Climate Investments to be invested in projects providing benefits to priority populations. This includes a target of 20% for projects benefitting disadvantaged communities and 15% for projects benefitting low-income communities, respectively.

Priority populations can be identified using the mapping tools provided by CARB at www.arb.ca.gov/cci-resources. Projects are not required to provide benefits to priority populations. However, projects that are determined to be providing benefits will be prioritized for funding. Projects benefitting Priority Populations will be identified automatically by the CDFA HSP RePlan Tool based on project location and net criteria air pollutant emission reductions determined consistent

---

1 “Socially disadvantaged farmer or rancher” means a farmer or rancher who is a member of a socially disadvantaged group. “Socially disadvantaged group” means a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of a group without regard to their individual qualities. These groups include all of the following:

NOTIFICATION AND FEEDBACK
All applicants will be notified by email regarding the status of their grant application. Applicants may expect to receive feedback on their grant application within 6 weeks of submission.

DISQUALIFICATIONS
The following will result in the disqualification of a grant application:
1. Incomplete grant applications: applications with one or more unanswered questions necessary for administrative or technical review.
2. Incomplete grant applications: applications with missing, blank, unreadable, corrupt, or otherwise unusable attachments.
3. Applications requesting funding for more than the maximum award amount.
4. Applications with unallowable costs or activities not necessary to complete the project objectives.
5. Applications that do not comply with Eligibility and Exclusions or do not meet Program Requirements.

APPEAL RIGHTS: Any discretionary action taken by the Office of Grants Administration (OGA) may be appealed to CDFA’s Office of Hearings and Appeals within ten (10) days of receiving a notice of disqualification from CDFA. The appeal must be in writing and signed by the responsible party named on the grant application or his/her authorized agent. It must state the grounds for the appeal and include any supporting documents and a copy of the OGA decision being challenged. The submissions must be emailed to CDFA.LegalOffice@cdfa.ca.gov (preferred) or sent to the California Department of Food and Agriculture Office of Hearings and Appeals, 1220 N Street, Sacramento, CA 95814. If submissions are not received within the time frame provided above, the appeal will be denied.

AWARD PROCESS
PAYEE DATA RECORD
If an application is selected for an award, the applicant will receive a
notification email with the request to fill out the payee data record form. The applicant must complete the form following the instructions provided on the form, electronically sign, and submit within 5 business days. Late submission of the payee data form may result in delay of grant execution or cancelation of award.

**PRE-PROJECT CONSULTATION**

After receiving notification of award, the grant recipient may be contacted by CDFA via email to conduct a pre-project consultation. In some cases, a phone call with grant recipient may be necessary. A CDFA environmental scientist will discuss with the recipient the project work plan, including management practice(s), APN, field number, acreage, materials and/or plant species (if applicable) associated with practice implementation, and budget. The purpose of the pre-project consultation is to ensure that practices and implementation methods in the funded project are compliant with 2021 HSP Incentives Program requirements and to allow CDFA to schedule verification site visits, if needed.

**GRANT AGREEMENT**

CDFA will initiate the Grant Agreement process with applicants selected to receive a 2021 HSP Incentives Program grant award. This process of executing a grant agreement is estimated to take several months. Following a pre-project consultation (if needed), applicants with projects selected for an award of funds will receive a Grant Agreement package with specific instructions regarding award requirements including information on project implementation, verification, and payment process.

</table>
PROJECT IMPLEMENTATION
Once a Grant Agreement is executed, the grant recipient may begin implementation of the project. Recipients are responsible for the overall management of the awarded project to ensure all project activities are completed as identified in the Grant Agreement.

Implementation must begin on or after the date the Grant Agreement is executed, and no later than December 31, 2022. Failure to begin project implementation prior to December 31, 2022 may result in all or any portion of the grant funding withheld or termination of the Grant Agreement. Implementation of HSP practices in years 2 and 3 must begin prior to December 31, 2023 and December 31, 2024, respectively.

PROJECT REPORTING REQUIREMENTS
Recipients are required to report annually soil organic matter content for each APN/ Field where HSP Management Practices are implemented. For this purpose, soil samples must be taken once prior to project implementation, and; one, two and three years following initial project implementation.

Each submission should contain a laboratory report of soil organic matter content for each field from any of the accredited soil analytical laboratories recommended by CDFA. The soil sampling protocol provided in HSP Soil Sampling Protocol for Soil Organic Matter Analysis must be followed when collecting soil samples.

PAYMENT PROCESS
Grant payment for the 2021 HSP Incentives Program is a flat-rate payment system on a reimbursement basis through yearly invoicing upon practice verification.

CDFA will provide the grant recipient with the necessary grant award and invoicing documents (See: Project Verification)

---

2 CDFA recommended soil analytical labs are listed in HSP Soil Sampling Protocol for Soil Organic Matter Analysis.
Note: For projects implementing compost application, information provided below must be noted:

- The estimated payments provided by the CDFA HSP Comet-Planner tool are based on the maximum allowable application rate for compost. In case of grant recipients applying compost at lower rates, the amount for reimbursements may be adjusted by CDFA to be consistent with tons of compost applied as part of the project. In case of projects applying on-farm produced compost, C:N ratio and applications rates must be consistent with those provided in the grant application. If finished compost has a different C:N ratio, application rates may be adjusted by CDFA to be consistent with allowable application rates for the HSP. This may result in a change in estimated payments and project budget.

ADVANCE PAYMENTS
If selected for funding, recipients may be eligible for advance payments of up to 25 percent of the grant award, subject to the provisions of section 316.1 “Advance Payments” of the California Code of Regulations, Division 1, Chapter 5.

PROJECT VERIFICATION
Recipients will be subjected to verification that the eligible agricultural management practices are implemented in a manner consistent with the USDA NRCS CPS guidelines, and Program Requirements in Appendix A. Verification will be conducted by CDFA environmental scientists who may conduct field evaluations by APN and/or remote evaluations through phone, video conferencing or emails to verify program compliance during the grant agreement term. CDFA may request any or all of the documentation listed in Appendix A in order to successfully complete project verification.

The purpose of project verification is to determine whether and when deliverables are being met and evaluate project progress to ensure the eligible agricultural management practice(s) are completed within the grant agreement term. Recipients may be required to submit project-related financial records and documentation (such as receipts for payment of services/goods) to ensure HSP Incentives Program funds are used in compliance with the Grant Agreement terms and conditions. Specific verification requirements for each
practice implementation are noted in Appendix A and will be provided in the Grant Awards Procedures manual. The verification must be completed prior to payment of grant funds. CDFA will withhold up to 10 percent from the total grant award until the verification requirements are complete.

The State of California has the right to review project documents and conduct audits during project implementation and over the project life.

POST-PROJECT COMPLETION REQUIREMENTS
Execution of the Grant Agreement is conditional upon agreement to post-project completion requirements. Recipients are required to maintain implementation of practices incentivized through this program through the term of the grant agreement. However, benefits from implementation of practices are expected to be achieved in the long term. Recipients are encouraged to continue and/or expand these practices on their operations to achieve long-term benefits. Additionally, grant recipients are required to maintain, three years after completion of project, documentation related to their HSP funded projects, including records documenting maintenance of the agricultural management practice(s) and any soil testing reports for the project APNs/fields, to keep records of actual benefits achieved from the project, and provide organic matter testing report for soil samples taken at 3-year after practice implementation.

Failure to work with CDFA to provide the necessary project-related documentation will be considered non-performance. In the event of non-performance, CDFA may take any action deemed necessary to recover all or any portion of the grant funding.

CDFA will contact a subset of awarded projects to collect data including, but not limited to, eligible agricultural management practice implementation and GHG reduction estimates, for three years after project completion.

STATE AUDIT AND ACCOUNTING REQUIREMENTS
In addition to HSP program requirements, awarded projects may be subject to State Audit and Accounting Requirements listed below.

AUDIT REQUIREMENTS
Projects are subject to audit by the State annually and for three (3) years following the final payment of grant funds. If the project is selected for audit, Grantee will be contacted in advance. The audit shall include all books, papers, accounts, documents, or other records of Grantee, as they relate to the project. All project expenditure documentation should be available for an audit, whether paid with grant funds or other funds.

Grantee must have project records, including source documents and evidence of payment, readily available and must provide an employee with knowledge of the project to assist the auditor. Grantee must provide a copy of any document, paper, record, etc., requested by the auditor.

ACCOUNTING REQUIREMENTS

Grantee must maintain an accounting system that:

- Accurately reflects fiscal transactions, with the necessary controls and safeguards.
- Provides a good audit trail, including original source documents such as purchase orders, receipts, progress payments, invoices, employee paystubs and timecards, evidence of payment, etc.
- Provides accounting data so the total cost of each individual project can be readily determined.

RECORDS RETENTION

Records must be retained for a period of three (3) years after final payment is made by the State. Grantee must retain all project records at least one (1) year following an audit.

DETAILED SCORING CRITERIA

<table>
<thead>
<tr>
<th>CRITERIA</th>
<th>MAX POINTS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. PROJECT LOGISTICS</td>
<td>10</td>
</tr>
<tr>
<td>- Proposed practice not implemented in the field currently or last year.</td>
<td></td>
</tr>
<tr>
<td>- For practice expanding to new acres: only new acres are eligible for funding.</td>
<td></td>
</tr>
<tr>
<td>- Proposed practice implementation methods must be consistent with the requirements in the corresponding NRCS CPS</td>
<td></td>
</tr>
</tbody>
</table>
2. **PROJECT DESIGN**
   - Project design schematic (map) created using the CDFA HSP Re-Plan tool (other schematics or maps not accepted). Plant species in the project if applicable (e.g., for Cover Crop) is provided.
   - Compost Application: C:N ratio and application rate are indicated and within eligible range.

3. **PROJECT WORK PLAN**
   - Tasks necessary to accomplish implementation of each proposed practice are feasible and all necessary tasks for each of the Project Year are included.
   - Timeline for completing all tasks is reasonable and achievable.
   - Please check:
     - All practices must be implemented/maintained each year for three years.
     - Soil samples must be taken prior to, one, two and three years after practice implementation.

4. **PROJECT BUDGET AND GHG EMISSION REDUCTIONS**
   - Only budgets prepared using the CDFA HSP COMET-Planner tool are allowed.
   - CDFA HSP COMET-Planner Report is provided.
   - Acres/feet in the budget is only for new practice(s) and/or new acres of existing practice(s). Input data (county, practice, and acreage) is consistent with what is provided in the project design. For cover crop practice implementation where legume and non-legume species are to be used in the same field, only acreage for legume species should be entered.

5. **CONSERVATION PLAN**
   - Documents: meet minimum requirements for the conservation plan.

| **TOTAL POINTS** | 60 |
All required application documents must be submitted by the deadline specified in this solicitation. In addition to the mandatory and optional attachments each applicant will provide, applicants must download, complete and upload the workplan template provided on this page: https://www.cdfa.ca.gov/oefi/healthysoils/incentivesprogram.html.

- **Project Work Plan Template**

Additional mandatory and applicable attachments include:
- CDFA HSP RePlan Report (mandatory; automatically uploaded to the application when completed in CDFA HSP RePlan Tool)
- CDFA-HSP COMET-Planner Report (mandatory)
- Landowner Agreement (if applicable).
- Conservation Plan (if applicable).
- A Grazing management plan for Prescribed Grazing Practice (if practice is included).

| 1-row, trees or shrub, with wind protection fence | $2.40/ft | (1) Containered seedlings at 15-20 cubic inches or bare root seedlings at 2-3 years old before transplanting (2) A wind-protection fence and irrigation are required; (3) Plant density ≥200 live plants/acre. | Irrigation; (5) Plant maintenance during the project term. |

**Definitions:**

**Cropland, Annual or Perennial:** Land where the crop(s) grown is identified as annual or perennial crop according to the Annual and Perennial Crop List for the Purpose of Conservation Compliance under the Food and Security Act of 1985, as amended or is determined as annual or perennial by the local USDA NRCS if it is not included in the list. Perennial cropland includes orchards and vineyards.

**Grazing land:** Land used primarily for production of forage plants maintained or manipulated primarily through grazing management.

**Grassland:** Land where the vegetation is dominated by grasses and other herbaceous (non-woody) plants, such as forbs.

**Rangeland:** Land on which the potential plant cover is composed principally of native grasses, grass-like plants, forbs or shrubs suitable for grazing and browsing, and introduced forage species that are managed like rangeland.

**Pasture** is a land use type having vegetation cover comprised primarily of introduced or enhanced native forage species that is used for livestock grazing. Pasture receives periodic renovation and cultural treatments such as tillage, fertilization, mowing, weed control, and may be irrigated. Pasture vegetation can consist of grasses, legumes, other forbs, shrubs or a mixture. Pasture differs from range in that it primarily produces vegetation that has initially been planted to provide preferred forage for grazing livestock.

**Foregone Income:** Reduced revenue that is generated mainly from reduced production because the land area used for growing cash crop(s) will be converted to Permanent Unfertilized Grass Cover or Grass/Legume Cover. A payment scenario name that includes Foregone Income has higher payment rate because it takes consideration of both the reduced revenue and the expense for implementing the conservation management practice.

**Geotagged photograph:** A geotagged photograph is a photograph which is associated with a geographic position by assigning a latitude and longitude to the image. For pictures taken with a mobile phone or digital camera, this can be achieved by enabling the GPS function of the device prior to capturing a picture. Geotagging helps CDFA confirm the correct location of practice implementation consistent with Project Design at the time of verification. Please check the link [https://www.cdfa.ca.gov/oefi/healthysoils/docs/InstructionsOnHowToTakeGeotaggedPhotos.pdf](https://www.cdfa.ca.gov/oefi/healthysoils/docs/InstructionsOnHowToTakeGeotaggedPhotos.pdf) for instructions on how to take and send geotagged photos.
APPENDIX B: CONFIDENTIAL INFORMATION

The California Public Records Act (Government Code sections 6250, et seq.) and related statutory definitions of "confidential or proprietary information" (also known as "trade secrets") determine what information provided by the applicant is exempt from public disclosure. The following describes how questions are resolved regarding what information is confidential, the legal protections for confidential information, and internal and program procedures to maintain confidentiality.

What is "confidential?"
The California Public Records Act prevents the disclosure of confidential or proprietary information including, but not limited to:

- Confidential Business and financial information, including volume of business, costs and prices, customers, financial condition, trade secrets, and similar information obtained under an express or implied pledge of confidence. (Ev. Code § 1060 and Gov. Code § 6254).
- Personal data including tax information prohibited from disclosure. (Gov. Code § 6254 and Rev. & Taxation Code § 19542.

Applicants are directed to clearly marked, on each page, "confidential/proprietary information" those documents they feel contain confidential or proprietary information. However, the mere marking of documents as "confidential/proprietary information" will not result in their being treated as confidential if they are not exempt from disclosure under the California Public Records Act.

What if there is a question about what is confidential?
The CDFA Legal Office will review the records and make a determination as to whether or not the records are exempt from disclosure.

What program procedures will keep information confidential?
Financial information will be analyzed, on a need-to-know basis, by staff from the CDFA, kept confidential, and will be maintained with restricted access. Grantee
businesses will agree to provide specific key financial information for three years to develop benchmarks to evaluate the program. The records will be kept for the amount of time set forth in CDFA’s Internal Record Retention Policy.
