

Exhibit P2: Processor–Low-Risk Processing Tomato Field

1. Harvested tomato fruit from a low-risk processing tomato field shall only be received from a transporter operating under a compliance agreement with the Broomrape Program.
2. Harvested tomato fruit from a low-risk processing tomato field shall only be received from a grower operating under a compliance agreement with the Broomrape Program.
3. Trucks and trailers transporting harvested tomato fruit from a low-risk processing tomato field inside a Designated Zone shall be cleaned reasonably free of soil and plant debris prior to exiting the Designated Zone. ([Designated Zone Map](#))
4. Establishment shall be in compliance with their local jurisdiction waste discharge requirements.
5. Harvesting machinery, including subcontractor custom harvesting machinery, shall be cleaned reasonably free of soil and plant debris prior to movement out of a Designated Zone ([Designated Zone Map](#)). See Broomrape Board recommended guidelines for examples ([Home | Broomrape](#))
6. Field crews shall be trained in broomrape identification and sanitation protocols.
7. The growing location of suspect broomrape plants shall be reported to the Grower immediately upon detection. In the event the detection is outside the Designated Zone, the Establishment must also notify the Program immediately. ([Designated Zone Map](#))
8. In the event of a status change from Exhibit G2 to Exhibit G1, the Establishment must notify the Program immediately.
9. The Program shall be allowed access to the processing facility yard with 48 hours advance notification in order to verify compliance with these requirements.
10. All required notifications to the Program and questions about this exhibit shall be made to the Program via email to: Broomrape_Program@cdfa.ca.gov
