I. Program Updates

Navel Orangeworm Area Wide Program – Multi-Phase Approach

Phase 1 – 2018-2022

Phase 1 was the Initial Phase of the Navel Orangeworm (NOW) Program (Program) with a focus on developing NOW sterile insect technique (SIT) moths, determining their viability during cold storage transfer, performing quality control (QC) on mating propensity and survivability of the sterile moths, developing a trap monitoring program, and collecting preliminary damage data from the orchards participating in the Program's project site.

Phase 2 – 2023-2026

Phase 2 is the Data Phase of the NOW Program. The focus of this phase is controlling variables within the orchards participating in the Program's project site to increase the integrity of the field data being collected.

Navel Orangeworm Sterile Insect Technique

The Navel Orangeworm Program utilizes NOW SIT moths obtained from the United States Department of Agriculture (USDA) and California Department of Food and Agriculture's (CDFA) Phoenix, Arizona Rearing Facility. QC tests are performed on every shipment of NOW SIT moths used for aerial releases.

Releases of sterile NOW moths began on April 2, 2026, over select sites in Fresno, Kings, and Kern Counties. Initially, releases were conducted exclusively over almond sites between April 2, 2026 and August 2, 2026. Beginning on August 3, 2026 and continuing through the remainder of the season, releases are being conducted exclusively over pistachio sites. These exclusive release periods are selected by the Navel Orangeworm Action Committee (NOWAC) to prioritize periods of crop specific vulnerability to NOW damage.

Listed below are any circumstances which prevented regular releases in 2026:

- April 21: No releases due to rain and muddy conditions preventing access to the release sites; magazine from April 21 held overnight for release on April 22
- April 22: Double aerial releases conducted for both magazines from April 21 and April 22
- April 25: No releases due to issue at rearing facility
- May 20: Ground release conducted at Zones 7 and 11 in lieu of aerial release due to pilot shortage
- May 23: No release due to pilot shortage and issue with ground release equipment
- June 1: No release due to issue with release equipment; magazine from June 1 held overnight for release on June 2
- June 2: Double aerial releases conducted for both magazines from June 1 and June 2
- August 8: No release due to issue with release equipment

- August 21: No release due to issue at rearing facility

- September 8: No release due to pilot shortage; magazine from September 8 held overnight for release on September 9

- September 9: Double aerial releases conducted for both magazines from September 8 and September 9

- September 23: Ground release conducted at Zones 23 and 25 in lieu of aerial release due to pilot shortage

- September 24: No release in California due to magazine being diverted to Arizona for research purposes

- September 25: Ground release conducted at Zones 24 and 34 in lieu of aerial release due to pilot shortage

Navel Orangeworm Trapping
The Phase 2 Areawide Project Site for 2026 currently includes 32 orchards: 16 pistachio and 16 almond, located within Fresno, Kings, and Kern counties. All 32 orchards, designated as Zones 3, 5-35, are approximately 160 acres each with 9 trap sites placed per zone. Trapping is conducted weekly year-round in all zones.

Zone 2 was removed from the program on April 20, 2026 due to management changes over the participating acreage. The replacement zone, Zone 35, was added to the program on July 13, 2026.

Listed below are any circumstances which prevented regular trap servicing in 2026:

- Week of January 2: No traps were serviced in all zones due to excessive rain and muddy conditions preventing access to trap sites

- Week of January 9: No traps were serviced in all zones due to excessive rain and muddy conditions preventing access to trap sites

- Week of January 16: No traps were serviced in Zones 14, 26, and 31 due to dense fog preventing safe travel to trap sites; no traps were serviced in Zones 20 and 21 due to pesticide applications on site; trap numbers 5 and 6 were not serviced in Zone 28 due to farm equipment and livestock preventing access to trap sites

- Week of January 23: No traps were serviced in Zones 5, 13, and 14 due to pesticide applications on site; trap numbers 4-9 not serviced in Zone 20 due to pesticide applications on site; trap number 5 not serviced in Zone 28 due to farm equipment and livestock preventing access to trap sites

- Week of January 30: Zones 13 and 14 not serviced due to pesticide applications on site; trap numbers 3, 4, 5, 8, and 9 not serviced in Zone 10 due to pesticide applications on site

- Week of February 13: Zones 13 and 14 not serviced due to pesticide applications on site; trap number 9 of Zone 28 and trap number 5 of Zone 29 not serviced due to farm equipment and livestock preventing access to trap sites

- Week of February 20: Only Zones 23 and 25 serviced due to excessive rain and muddy conditions preventing access to trap sites

- Week of February 27: Zone 3 not serviced due to muddy field conditions preventing access; Trap number 5 not serviced in Zone 26 due to muddy field conditions preventing access; Trap numbers 1 and 2 not serviced in Zone 29 due to farm equipment and livestock preventing access to trap sites

- Week of March 6: Zone 14 not serviced due to pesticide applications on site

- Week of March 13: Trap numbers 5, 6, 7, and 8 not serviced in Zone 31 due to pesticide applications on site

- Week of March 20: No traps were serviced in Zones 3, 5, 25, 28, 29, and 30 due to pesticide applications on site; trap number 2 not serviced in Zone 14 due to farm equipment preventing access to trap site
- Week of April 3: No traps were serviced in Zone 2 due to pesticide applications on site; only trap numbers 3 and 4 were serviced in Zone 15 due to pesticide applications on site
- Week of April 10: No traps were serviced in Zones 2, 26, and 27 due to pesticide applications on site
- Week of April 17: No traps were serviced in Zones 2, 20, 21, and 22 due to pesticide applications on site
- Week of April 24: No traps were serviced in Zones 8, 22, 27, and 33 due to pesticide applications on site; no traps were serviced in Zones 13, 14, and 23 due to staffing issues; all Zone 2 traps were removed due to request from grower
- Week of May 1: No traps were serviced in Zones 23, 31, 32, and 33 due to pesticide applications on site
- Week of May 8: No traps were serviced in Zones 3, 7, and 18 due to pesticide applications on site
- Week of May 15: No traps were serviced in Zone 3 due to pesticide applications on site
- Week of May 29: No traps were serviced in Zones 5, 10, 12, and 20 due to staffing issues
- Week of June 5: No traps were serviced in Zone 6 due to pesticide applications on site
- Week of June 19: No traps were serviced in Zones 19, 31, 32, and 33 due to pesticide applications on site
- Week of June 26: No traps were serviced in Zones 20, 21, and 29 due to pesticide applications on site
- Week of July 3: No traps were serviced in Zone 18 due to pesticide applications on site
- Week of July 10: No traps were serviced in Zones 3, 7, 8, 20, and 21 due to pesticide applications on site
- Week of July 17: No traps were serviced in Zone 25 due to pesticide applications on site
- Week of July 24: No traps were serviced in Zones 3 and 13 due to pesticide applications on site
- Week of July 31: No traps were serviced in Zone 6 due to pesticide applications on site
- Week of August 7: No traps were serviced in Zones 21 and 25 due to pesticide applications on site
- Week of August 14: No traps were serviced in Zones 3, 22, and 27 due to pesticide applications on site
- Week of August 21: No traps were serviced in Zones 6, 22, and 23 due to staffing issues
- Week of August 28: Not traps were serviced in Zones 6, 7, 8, 9, 11, 12, 16, 17, 18, 19, 22, 23, 31, 32, 33, and 34 due to staffing issues
- Week of September 4: No traps were serviced in Zones 3, 6, 13, 14, 25, and 26 due to staffing issues; trap numbers 5 and 6 not serviced in Zone 18 due to farm equipment preventing access to trap sites
- Week of September 11: No traps were serviced in Zones 3, 5, 6, 10, 12, 13, 20, 21, 24, 25, 27, and 35 due to staffing issues
- Week of September 18: No traps were serviced in Zones 5, 9, 18, 22, and 23 due to staffing issues; only trap numbers 4 and 5 were serviced in Zone 8 due to pesticide applications on site; trap number 4 not serviced in

Zone 15 due to farm equipment preventing access to trap site

- Week of September 25: No traps were serviced in Zones 7, 8, 9, 11, 15, 16, 17, 18, 19, 22, 23, 31, 32, 33, and 34 due to staffing issues

II. Project Design

The 2026 Area Wide Project Site currently includes 32 orchards located in Fresno, Kings, and Kern counties. Listed below is information related to each orchard within the Program's project site for 2026:

Zone #	Crop Type	Acres	Release/Non-release Site	Date Added to Area Wide Project
Zone 3	Almond	160	Non-release	February 2023
Zone 5	Pistachio	160	Release	March 2023
Zone 6	Pistachio	160	Non-release	March 2023
Zone 7	Almond	160	Release	April 2023
Zone 8	Almond	160	Release	April 2023
Zone 9	Almond	160	Non-release	May 2024
Zone 10	Almond	160	Release	May 2025
Zone 11	Almond	160	Release	May 2025
Zone 12	Almond	160	Non-release	May 2025
Zone 13	Almond	160	Release	May 2025
Zone 14	Almond	160	Non-release	May 2025
Zone 15	Almond	160	Release	May 2025
Zone 16	Almond	150	Non-release	May 2025
Zone 17	Almond	173	Release	May 2025
Zone 18	Almond	150	Non-release	May 2025
Zone 19	Almond	183	Non-release	May 2025
Zone 20	Almond	150	Release	May 2025
Zone 21	Almond	155	Non-release	May 2025
Zone 22	Pistachio	180	Non-release	June 2025
Zone 23	Pistachio	155	Release	July 2025
Zone 24	Pistachio	155	Release	July 2025
Zone 25	Pistachio	160	Release	July 2025
Zone 26	Pistachio	155	Non-release	July 2025
Zone 27	Pistachio	150	Non-release	June 2025
Zone 28	Pistachio	160	Non-release	July 2025
Zone 29	Pistachio	170	Non-release	July 2025
Zone 30	Pistachio	160	Release	July 2025
Zone 31	Pistachio	155	Release	July 2025
Zone 32	Pistachio	160	Non-release	July 2025
Zone 33	Pistachio	160	Non-release	July 2025
Zone 34	Pistachio	160	Release	July 2025
Zone 35	Pistachio	160	Release	July 2026

Each zone has a trap site ratio of approximately one trap site per 18 acres for a total of 9 trap sites for each 160-

acre zone. Each trap site has one trap baited with NOW pheromone/PPO lures. All traps are serviced on a weekly basis. Servicing includes collecting trap bottoms and replacing them with new trap bottoms. Bait/lure changes occur once a month, and trap tops are replaced as needed. Counts are performed on each trap collected to determine number of wild versus sterile captures and male versus female captures.

III. Trap Results for the Weeks of September 18 and September 25, 2026

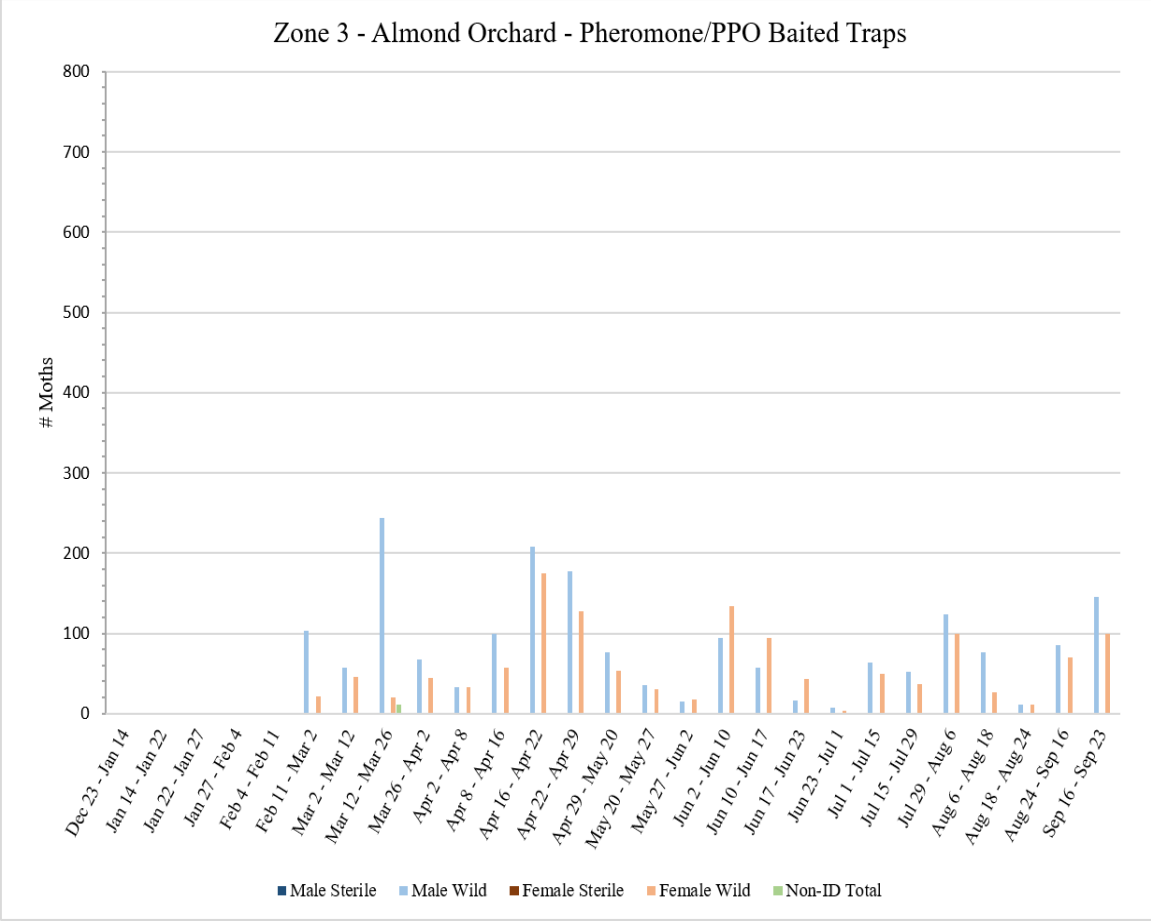

Zone 3 – Almond Orchard

A total of **9** pheromone/PPO lure-baited traps were collected from Zone 3 on Wednesday, September 16.

A total of **9** pheromone/PPO lure-baited traps were collected from Zone 3 on Wednesday, September 23.

[7]Sep 15 -								

[1]No traps were serviced in Zone 31 during the weeks of January 2 and January 9 due to excessive rain and muddy conditions preventing access; no traps were serviced in Zone 31 during the week of January 16 due to dense fog preventing safe travel to trap sites

[2]No traps were serviced in Zone 31 during the week of February 20 due to excessive rain and muddy conditions preventing access

[3]Trap numbers 5, 6, 7, and 8 not serviced in Zone 31 during the week of March 13 due to pesticide applications

on site
[4]No traps were serviced in Zone 31 during the week of May 1 due to pesticide applications on site
[5]No traps were serviced in Zone 31 during the week of June 19 due to pesticide applications on site
[6]No traps were serviced in Zone 31 during the week of August 28 due to staffing issues
[7]No traps were serviced in Zone 31 during the week of September 25 due to staffing issues

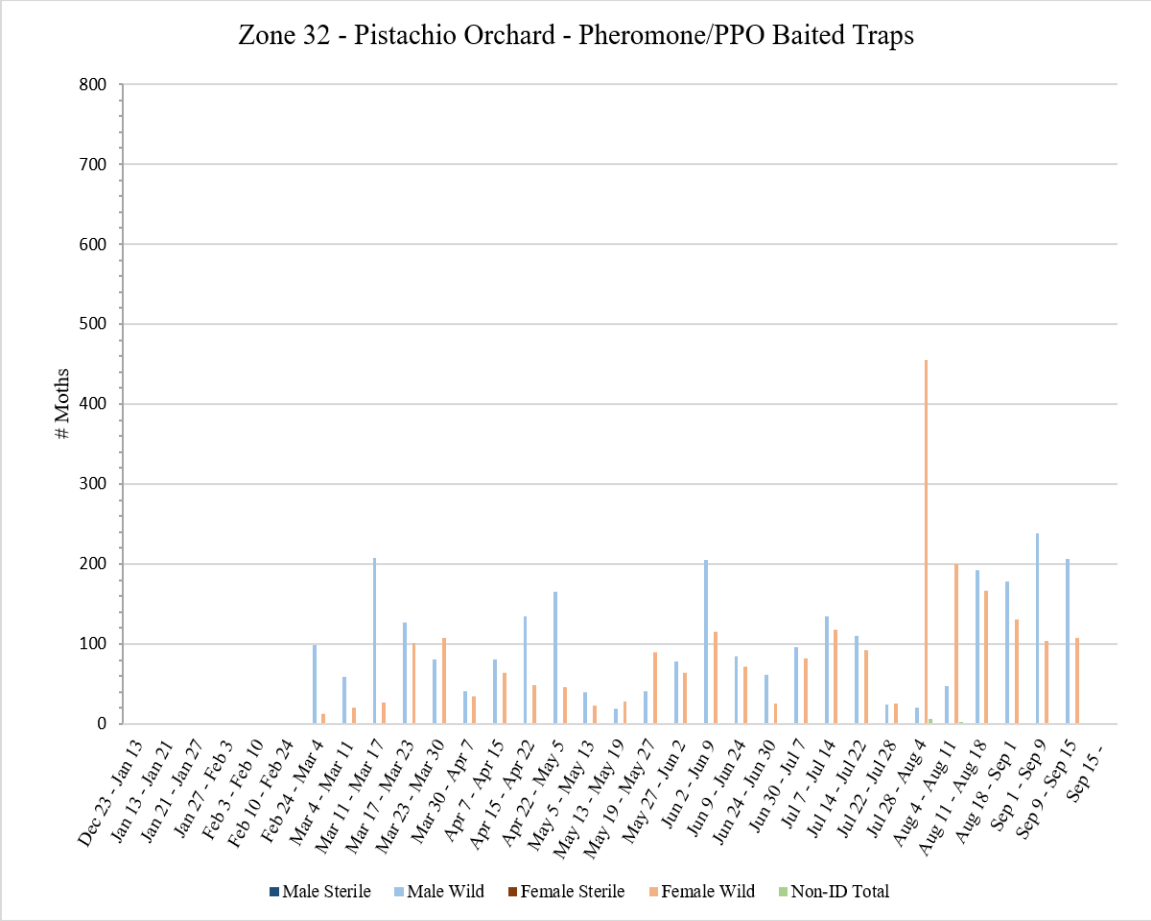

Zone 32 – Pistachio Orchard

A total of **9** pheromone/PPO lure-baited traps were collected from Zone 32 on Tuesday, September 15.

No traps were collected from Zone 32 during the week of September 25 due to staffing issues.

IV. NOW Degree Days

NOW Degree days begin to accumulate when ambient temperatures remain between the lower threshold of 55° F and the upper threshold of 94° F. Using data from weather stations nearest to the trap sites, courtesy of the UC IPM website - https://ipm.ucanr.edu/PHENOLOGY/ma-navel_orangeworm.html, the chart below shows daily and total accumulated degree days starting on January 1, 2026. The model uses a single sine and horizontal cutoff method of calculating degree days.

Weather Station Location: Five Points, Fresno

Date	Air Temperatures (°F)		Degree Days	
	Min	Max	Daily	Accumulated
01/01/2026	48.80	66.10	4.09	4.09
01/02/2026	43.50	69.10	4.75	8.84

V. Quality Control

QC tests are performed on samples taken from each shipment of sterile NOW moths. These tests include: zero-hour mortality rates, zero-hour mating dissections, forty-eight-hour mating dissections, seven-day longevity monitoring, and crush tests. Throughout the span of a week, Monday through Sunday, the results of each test are averaged. Below are the QC results from samples of sterile NOW moths taken during the week of Monday, September 7, 2026 to Sunday, September 13, 2026:

- 0% of moths from samples found dead at zero hour
- 1% of moths from samples found to have mated at zero hour
- 77% of moths from samples found to have mated after forty-eight hours
- 76% of moths from samples remained alive after seven days in BioChamber
- 95% of moths from samples found to have distinct red dye markings

Below are the QC results from samples of sterile NOW moths taken during the week of Monday, September 14, 2026 to Sunday, September 20, 2026:

- 0% of moths from samples found dead at zero hour
- 5% of moths from samples found to have mated at zero hour
- 65% of moths from samples found to have mated after forty-eight hours
- 83% of moths from samples remained alive after seven days in BioChamber
- 90% of moths from samples found to have distinct red dye markings
