

Nematology SERVICE SAMPLE FEE SCHEDULE

Effective November 14, 2016

| NEMATOTOLOGY METHODS | PRICE |
|--|----------------------|
| SAMPLE PROCESSING | |
| Preparation and extraction, per sample | \$17.50/quarter hour |
| MORPHOLOGY | |
| Morphological inspection or identification, per sample | \$17.50/quarter hour |
| CONVENTIONAL PCR | |
| Conventional PCR processing, 1-40 samples (single PDR) | \$52.50 |
| Conventional PCR, per sample | \$20.00 |
| DNA SEQUENCING | |
| DNA sequence and analysis, per assembled sequence | \$43.00 |
| SCANNING ELECTRON MICROSCOPY | |
| SEM processing, 1-7 samples (single PDR) | \$35.50 |
| SEM, per sample | \$19.00 |

An Administrative Fee of \$17.50 (covering one quarter hour) will be charged per group of up to 40 samples submitted on a single Pest and Damage Report (PDR) form, to cover the cost of data entry, generating and tracking invoices, and creating laboratory analysis reports. For submissions of more than 40 samples, the Administrative Fee will be charged in quarter-hour increments for each group of up to 40 samples submitted at the same time.

The minimum time required per sample for preparation and extraction is one half hour (30 minutes). The typical time required per sample for morphological identification is a quarter hour (15 minutes). In certain situations, these periods may exceed the minimum. These time estimates do not include molecular diagnosis or scanning electron microscopy.
