INFORMATIVE DIGEST/POLICY STATEMENT OVERVIEW

Existing law provides that the Secretary is obligated to investigate the existence of any pest that is not generally distributed within this State and determine the probability of its spread, and the feasibility of its control or eradication (Food and Agricultural Code Section 5321).

Existing law also provides that the Secretary may establish, maintain and enforce quarantine, eradication and other such regulations as he deems necessary to protect the agricultural industry from the introduction and spread of pests (Food and Agricultural Code, Sections 401, 403, 407 and 5322). Existing law also provides that eradication regulations

may proclaim any portion of the State as an eradication area and set forth the boundaries, the pest, its hosts and the methods to be used to eradicate said pest (Food and Agricultural Code Section 5761).

There is no existing, comparable federal regulation or statute regulating the intrastate movement.

AMENDED TEXT

This proposal will remove approximately 10 square miles of the South Park area of San Diego County from the regulation. This proposal will also add approximately five miles to the existing quarantine area in Long Beach, Los Angeles County; approximately one square mile to the Sacramento area of Sacramento County; approximately seven square miles to the Manteca area of San Joaquin County; one square miles to the Los Osos area of San Luis Obispo County; and, approximately one square mile to the Ryer Island area of Sacramento County. The effect of this proposed change to the regulation will be to remove and add authority for the State to perform quarantine activities against LBAM (*Epiphyas postvittana*) in these areas.
