INFORMATIVE DIGEST/POLICY STATEMENT OVERVIEW

Existing law provides that the Secretary is obligated to investigate the existence of any pest that is not generally distributed within this state and determine the probability of its spread, and the feasibility of its control or eradication (Food and Agricultural Code Section 5321).

Existing law also provides that the Secretary may establish, maintain, and enforce quarantine, eradication, and other such regulations as he deems necessary to protect the agricultural industry from the introduction and spread of pests (Food and Agricultural Code, Sections 401, 403, 407 and 5322). Existing law also provides that eradication regulations may proclaim any portion of the State as an eradication area and set forth the boundaries, the pest, its hosts, and the methods to be used to eradicate said pest (Food and Agricultural Code Section 5761).

The adoption of 3591.20 and subsections (a),(b), (c) and (d) established Alameda and Contra Costa counties as eradication areas for the light brown apple moth, *Epiphyas postvittana*, hosts, possible carriers and means and methods that may be used within the eradication areas to eradicate or control light brown apple moth, *Epiphyas postvittana*. The effect of this action was to establish authority for the State to conduct eradication activities in Alameda and Contra Costa counties against this pest. There is no existing, comparable federal regulation or statute.
