

California Fruit Tree, Nut Tree, and Grapevine Improvement Advisory Board (IAB) and Stakeholders

2025 Vine Mealybug Trapping Report

A total of 804 traps were set at 41 grapevine R&C planting sites in 10 counties (-115 traps compared to 2024). Vine mealybug (VMB) detections are summarized in the table and map shown below:

2025 VMB Trapping by CDFA

County	Acreage	Indoor Sq. Ft.
El Dorado	34	-
Kern	971	1,600,807
Monterey	92	-
San Benito	-	2,500
Santa Barbara	388	-
Solano	121	57,600
Sonoma	21	-
Stanislaus	-	261,525
Sutter	45	-
Tulare	1	-
TOTAL	1,673	1,922,432

There were 4 sites with over 5 VMB detected, 5 sites with 1 to 5 VMB detected only, and 32 sites with no VMB detected in any trap. In traps with over 5 VMB, 70% were located in Kern County, 20% in Tulare County, and 10% in Sonoma County.
