

# CDFA Citrus Division Update

Nursery Advisory Board Meeting  
November 28, 2023

CITRUS PEST & DISEASE  
PREVENTION PROGRAM

# ACP/HLB Status

# APHIS ACP Update

Updated Federal Order to  
reflect CA regional quarantine  
established in 2018

No change to California status

Subject: APHIS Expands and Establishes Asian Citrus Psyllid (ACP) Quarantine Areas in California

To: State, Tribal, and Territory Agricultural Regulatory Officials

Effective immediately, the USDA's Animal and Plant Health Inspection Service (APHIS), in cooperation with the California Department of Food and Agriculture (CDFA), is expanding the areas quarantined for Asian Citrus Psyllid (ACP) in California. APHIS is expanding the quarantine areas described in DA-2014-46 to include the entire Counties of Fresno, Kern, San Luis Obispo, and Tulare counties. Due to the logistical challenges associated with an expanding 5-mile buffer from subsequent detections of ACP, CDFA established county-level quarantines for ACP in California. Parallel to CDFA's quarantine, due to ACP detections, APHIS is also adding 18 new Counties in California: Alameda, Contra Costa, Kings, Madera, Marin, Merced, Monterey, Placer, Sacramento, San Benito, San Francisco, San Joaquin, San Mateo, Santa Clara, Solano, Sonoma, Stanislaus, and Yolo Counties.

APHIS is applying safeguarding measures on the interstate movement of regulated articles from the quarantined areas in California. These measures parallel the intrastate quarantines that CDFA established. This action is necessary to prevent the spread of transmissible disease, such as Huanglongbing (HLB), by ACP to non-infested areas of the United States.

The specific changes to the quarantine areas are attached and can also be found at the [APHIS Asian Citrus Psyllid \(ACP\) website](#). APHIS will publish a notice of these changes in the Federal Register.

# Recent HLB Detections

## Ventura County – Santa Paula

- 9/19 – CLas identified in psyllid(s)
- 9/27 – HLB detected in 2 trees on one property
- 10/3 – Quarantine established

## San Diego County – Valley Center

- 10/18 – CLas identified in psyllid(s)

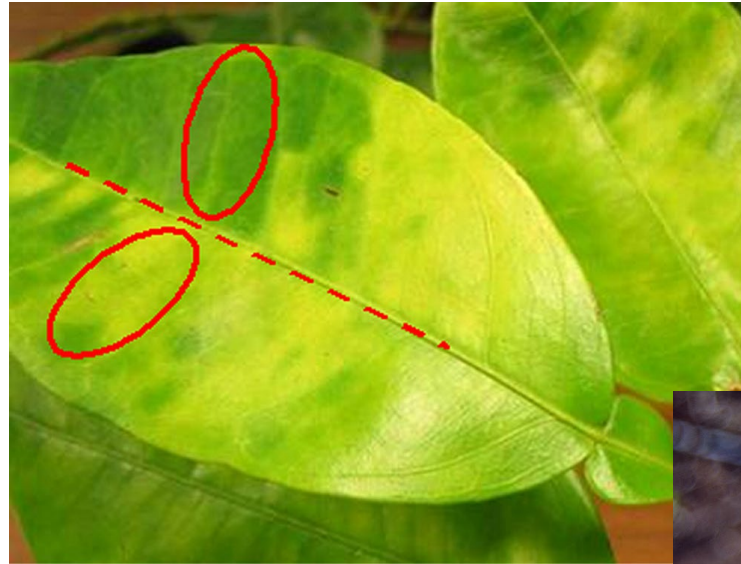

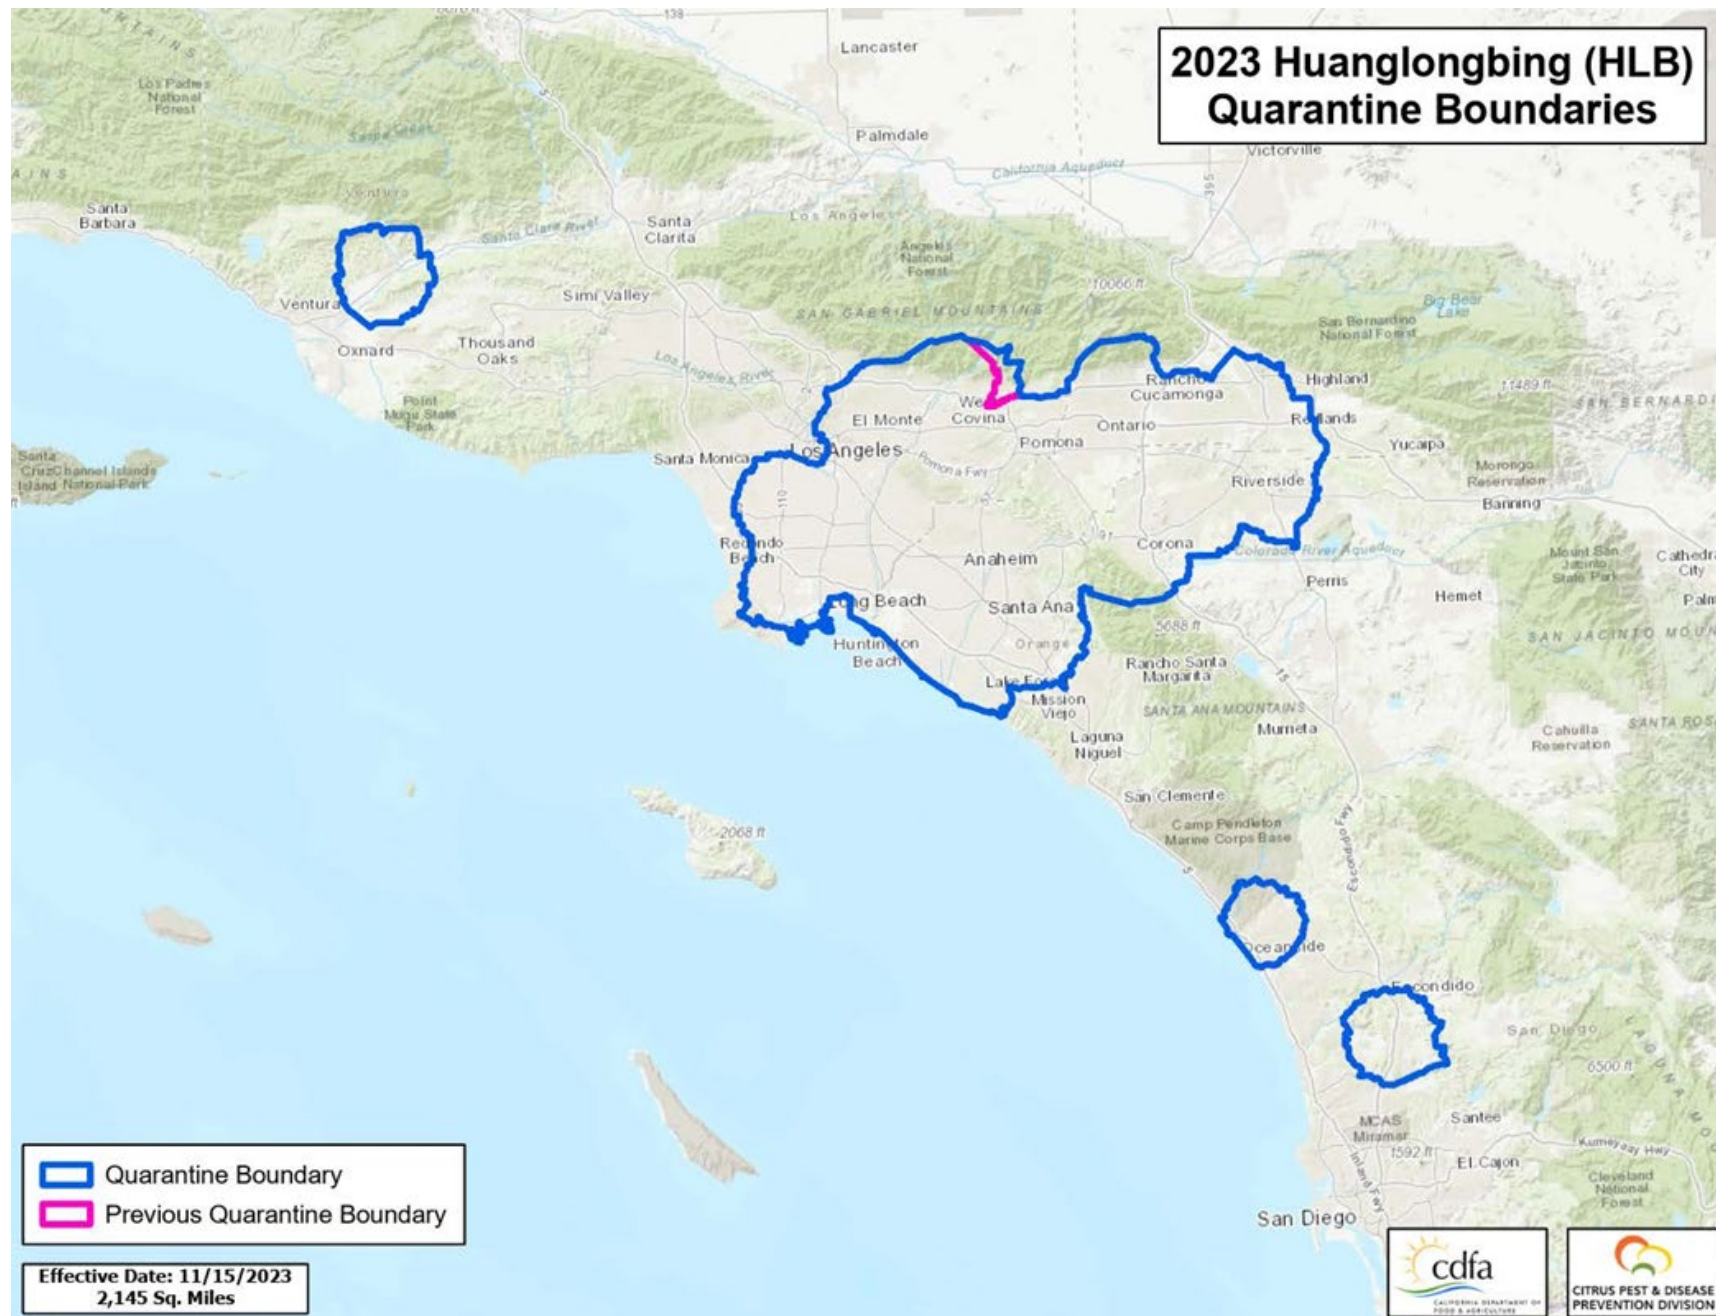

# HLB Detections

- Los Angeles County: 1,358
- Orange County: 4,725
- Riverside County: 211
- San Bernardino County: 383
- San Diego County: 56
- Ventura: 57

**Total: 6,790 (759 ACP+)**  
(As of 11/17/23)

# 2023 Huanglongbing (HLB) Quarantine Boundaries

# CNS Updates

- Currently no outdoor CNS in an HLBBQ
- Citrus Nursery Stock Pest Cleanliness Program regs to be updated

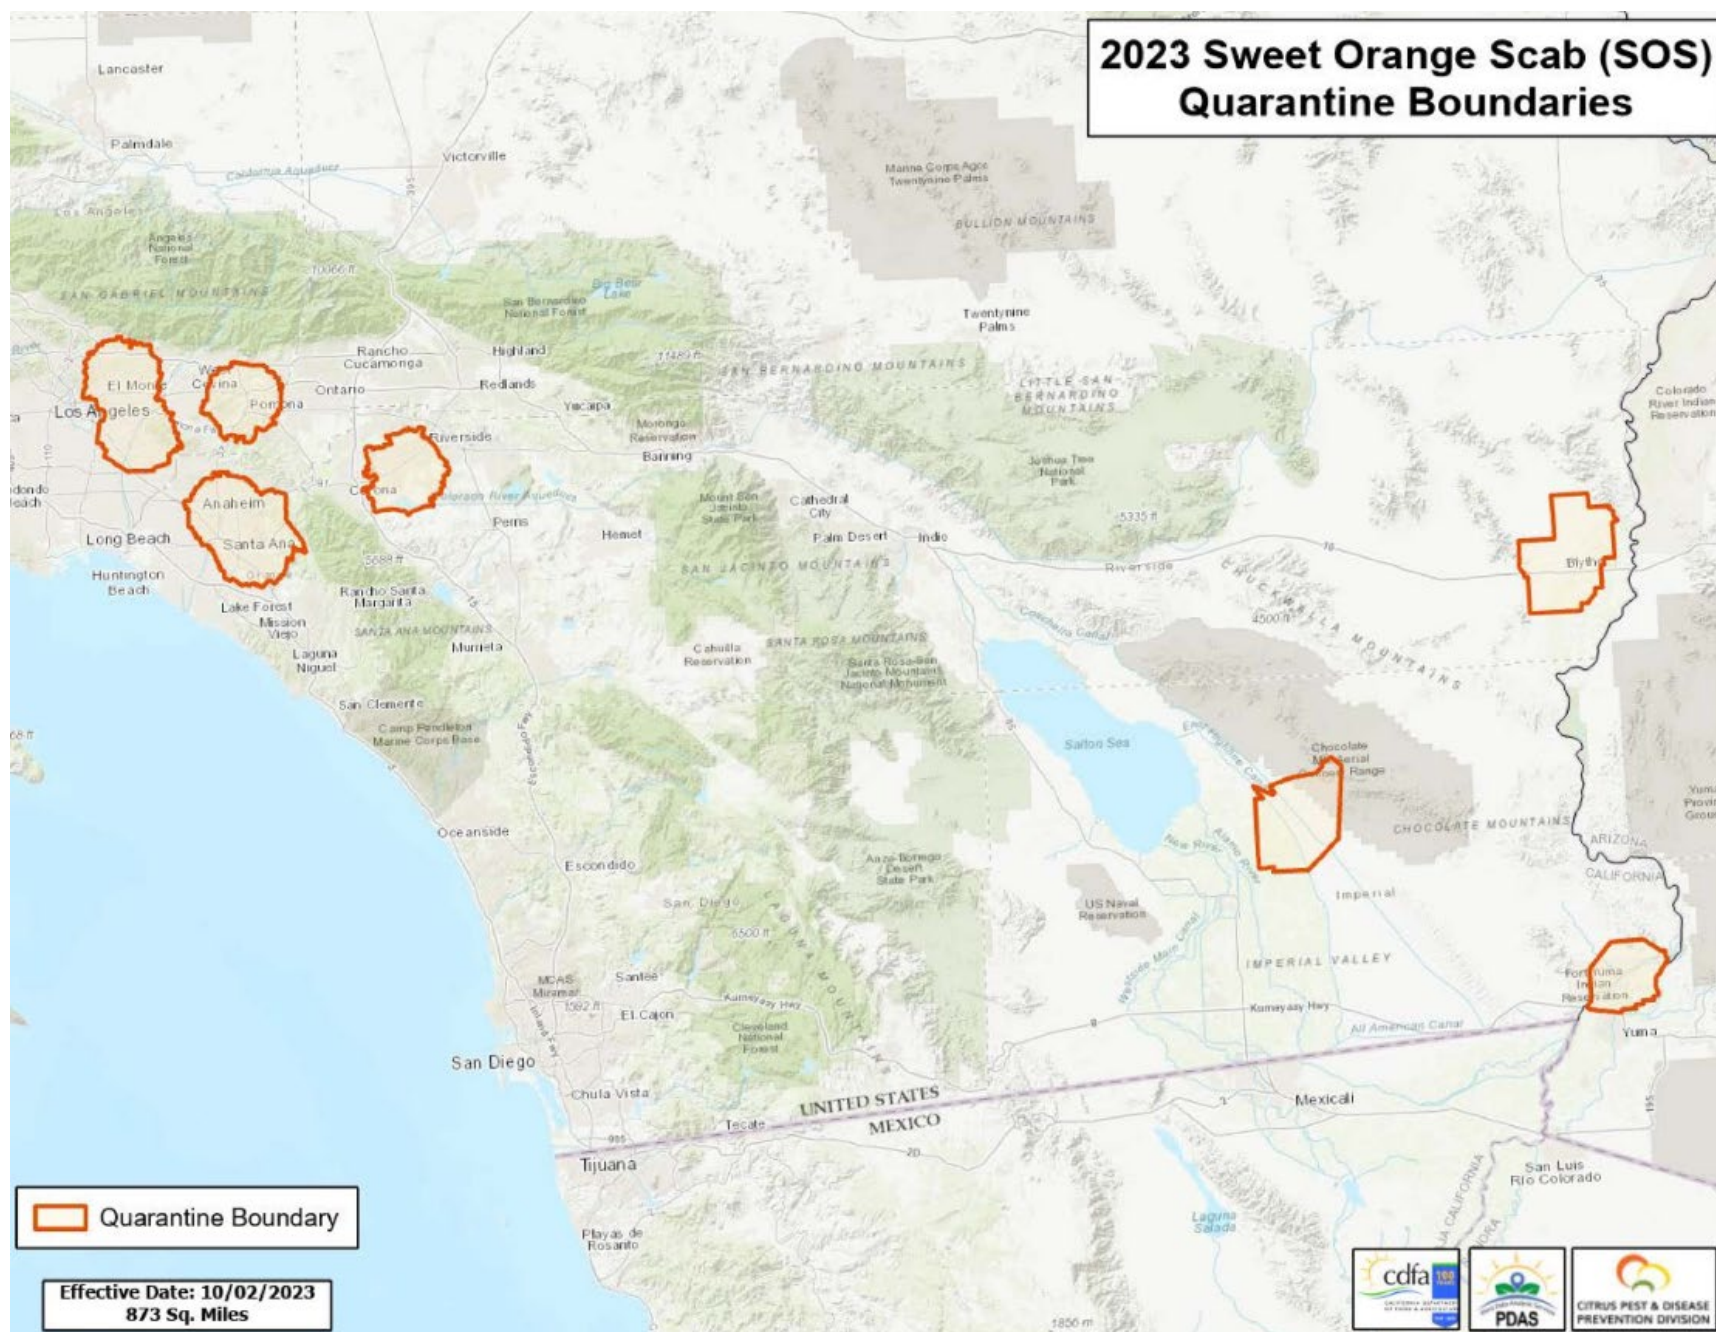

# Regulatory Updates

# 2023 Sweet Orange Scab (SOS) Quarantine Boundaries

# Citrus Yellow Vein Clearing Virus Status

- March 2022 – first detection in the western hemisphere
- 581 positive trees – Tulare County
  - 579 – City of Tulare
  - 2 – City of Visalia
- State interior quarantine to be established
  - ½-mile radius
  - Tree removal not required
  - Requirements likely to mirror ACP/HLB reg
- CYVCV to be added to clean citrus nursery program testing
