

2023 California Strawberry Plant Participants Registration and Certification Program

The following firms have entered foundation, increase, and/or certified plantings to be inspected to determine eligibility for certification. Strawberry plants in Foundation Plantings are index-tested for the following viruses: mottle, vein-banding, crinkle, mild yellow-edge, necrotic shock, pallidosis, tomato ringspot, witches' broom, pseudo mild yellow-edge, latent C, leafroll and featherleaf.

California certified strawberry plants are grown under the terms of the California Certified Strawberry Plant Regulations, section 3049 through 3049.5 CCR. Certified strawberry plants are three years or less from actual index-testing.
